Cambridge Technology Enterprises Continues Momentum

IT leader servicing a continually widening spectrum of industries

April 9, 2015 - KANSAS CITY, Mo. -- Cambridge Technology Enterprises Ltd (CTE), an IT services leader focused on the convergence of big data and cloud, today announced two large business relationships with leaders in both the power electronic and consumer goods industries.

Through its recently announced Gold Level membership in the Oracle Partner Network (OPN), CTE is providing migration and cloud implementation services such as Oracle's E-Business Suite to an industry-leading company within the power electronic/automation space. CTE's experience with Oracle's offerings allow them to seamlessly enhance this company's service quality, saving them significant costs as they migrate Oracle's services to their business ventures.

CTE's other latest business venture is a consulting relationship with a leading consumer goods company. A long time CTE customer, this business has annual revenue of over $3 billion. Through this new relationship, CTE is taking over all Oracle products and services for the company, furthering CTE's expertise within Oracle-related initiatives. CTE repeatedly demonstrates its dedication to leveraging the Oracle Cloud platform across several industries, particularly in focus regions such as the Midwest.

"Our Gold Level membership within the Oracle Partner Network has given us a lot of momentum as we continue driving our services to boost our client's value through migrating their systems towards the intersection of cloud and big data," said Aashish Kalra, Chairman of Cambridge Technology Inc. "It's great to work with such great companies, and we're excited to see what the future holds."

About Cambridge Technology Enterprises Ltd:
Cambridge Technology Enterprises Ltd (CTE) is an IT services leader focused on the convergence of big data and cloud. Recognized as a thought leader and innovator of enterprises solutions, CTE focuses on cloud application development and management, data warehousing, business intelligence (BI) and analytics on the cloud. Through designing and implementing enterprise IT strategies that leverage the cloud's capabilities, CTE's end-to-end services enable its customers to harness all the data they have available to them. Due to its expertise across a variety of domains, CTE serves as a single source for IT Strategy and Implementation to its customers. Visit www.ctepl.com for more information.
