Cambridge Technology Enterprises Announces Contract with I.D. Systems

PRLog - May 6, 2015 - TOPEKA, Kan. -- Cambridge Technology Enterprises Ltd ("CTE") (<http://www.ctepl.com/>), an IT services leader focused on the convergence of big data and cloud, today announced it has developed a contract with I.D. Systems (<http://www.id-systems.com/>), a leading global provider of wireless M2M solutions for securing, tracking and managing high-value enterprise assets. The multi-year agreement is composed of multiple system, smoke, and automation testing initiatives.

ID Systems has been at the forefront of utilizing radio frequency identification, or RFID, technology for wireless vehicle management and fleet tracking. Receiving almost 7 million dollars through a contract with the USPS in 1995, "(NASDAQ: IDSY)" went public in 1999. Since then, the company has continually proven itself an innovative leader.

Under this agreement, Cambridge Technology Enterprises Ltd will focus on testing services for I.D. Systems, which will be mainly conducted at CTE's recently launched development center. CTE and I.D. Systems have also agreed to collaborate on an I.D. Systems application. Through all of this, CTE will be working as an independent tester of I.D. Systems' complex embedded systems before they are distributed to their customers.

"Given our focus on the convergence of cloud and big data, we also like to place a fairly strong emphasis on global world information," said Aashish Kalra, Chairman of Cambridge Technology Enterprises Ltd. "We are absolutely thrilled to be working with a leading company like I.D. Systems and assist them in finding the best possible solutions to make their business as efficient as possible."

About Cambridge Technology Enterprises:

Cambridge Technology Enterprise Ltd ("CTE") is an IT services leader focused on the convergence of big data and cloud. Recognized as a thought leader and innovator of enterprises solutions, CTE focuses on cloud application development and management, data warehousing, business intelligence (BI) and analytics on the cloud. Through designing and implementing enterprise IT strategies that leverage the cloud's capabilities, CTE's end-to-end services enable its customers to harness all the data they have available to them. Due to its expertise across a variety of domains, CTE serves as a single source for IT Strategy and Implementation to its customers. Visit www.ctepl.com for more information.

About I.D. Systems

Headquartered in Woodcliff Lake, New Jersey, with subsidiaries in Texas, Germany, and the United Kingdom, I.D. Systems is a leading global provider of wireless M2M solutions for securing, controlling, tracking, and managing high-value enterprise assets, including rental cars, industrial vehicles, trailers, containers, and cargo. The Company's patented technologies address the needs of organizations to monitor and analyze their assets to increase efficiency and productivity, reduce costs, and improve profitability.
