Anant J. Talaulicar, Chairman & Managing Director, Cummins India Limited said, "Despite a challenging global and domestic demand scenario, Cummins has improved its operational performance, thus sustaining margins and profitability. The business sentiment in the country has improved and so is our optimism about economic growth based on the strong intent of the new government to put the economy back on the growth track. We have however, not experienced any resurgence in domestic demand yet. However, economic reforms aimed at making India a manufacturing hub, tax reforms and infrastructure investments will allow Cummins in India to grow by providing innovative power solutions and dependable services."
