Volumes, lower costs may drive auto firms' margins

But inflationary trend could act as a speed breaker, caution analysts

SHALLY SETH MOHILE
Mumbai, 15 November

Brokerages expect margins of auto companies especially passenger vehicle makers to expand in the coming quarters because of softer raw material costs and higher volumes. Many companies as a result have seen an upward revision in estimates for them by the brokerages.

The optimism for the quarters ahead also comes from a positive management commentary and improved outlook. But the benefits of lower steel and precious metal prices are seen being eroded by an increase in the prices of crude derivatives, and this may negate some gains.

Car market leader Maruti Suzuki India will be one of the key beneficiaries of the lower raw material costs and strong volumes as production and deliveries pick up the pace.

Maruti expects new products (recent and future models) to help the company attain a dominant position in utility vehicles (UVs). As of September 2022, its order book stood at 412,000 units. "Driven by better scale and pricing, we expect the Ebitda margin to expand from 6.5 per cent in FY22 to 9.5 per cent in FY23E, and to 11.5 per cent in FY25E," wrote Raghunandan N L, analyst at Emkay Research, in a post-earnings report.

Emkay has a target price of ₹11,000 for the stock. Its current market price as on November 15 was ₹9,159. The brokerage has pencilled in 11 per cent growth in volumes in FY23. But a few companies didn't see the benefits of lower commodity prices in the September quarter; if anything, they witnessed the residual impact of higher prices as they were still left with material bought at higher prices.

Eicher Motors' motorcycle-making arm, Royal Enfield (RE), is yet to benefit from the decline in raw material prices. Thus in Q2, it was unable to protect gross margin from declining due to rising sales of Hunter — the company's latest 350cc model priced at ₹1.66 lakh. "The same (margin improvement) should be visible from Q3 as gross margin starts improving with price hikes and commodity price decline benefit seeping through," wrote Basudeb Banerjee, analyst at ICICI Securities, in a recent research note. The company's management has guided for a margin expansion. It also expects a better operating leverage to cushion a slight margin dilution due to Hunter's pricing.

Mahindra & Mahindra, which delivered a better-than-expected Q2 performance, is another company that has seen forecasts being revised. The upgrades have come on the back of a higher-than-expected average selling price of ₹7.62 lakh — up 6 per cent quarter-on-quarter. With successful SUV launches and a strong order book of 260,000 units, Mahindra plans to expand SUV capacity from 29,000 units per month at end-FY22 to 39000/49000 units per month in FY23/FY24. Its domestic UV share has improved by 200 basis points since FY22 to 17 per cent. SXCV B"We expect margins to improve from here on, led by improved chip supplies to service healthy order book, fixed-cost optimisation, decrease in raw material cost, and aggressive pricing," wrote Mansi Lall, analyst at Prabhudas Lilladher, in a November 14 report. She expects commodity tailwinds would further benefit margins and has built in a 300-basis point expansion over FY22-25.

Like Royal Enfield, the management of TVS Motor Co is optimistic about the road ahead. The better availability of chips will aid in production ramp-up of premium motorcycles which, in turn, will improve the mix and drive margin expansion. Though the supply-side issues started easing in Q2FY23, they still impacted the production of premium motorcycles, restricting the full benefit of the improvement in the mix. "We raise our FY23/FY24 EPS estimate by 5 per cent /7.5 per cent, led by an upgrade in volumes on supply-side improvements and a favourable rupee," Jinesh Gandhi, research analyst at Motilal Oswal wrote in a research report.

Even as the road ahead for most companies looks smooth the inflationary trend may play a spoilsport, cautioned analysts.

Build equity-heavy portfolio for child's education goal

This is essential to combat the high inflation in cost of education

KARTHIK JEROME

In a recent ruling, the Supreme Court upheld an Andhra Pradesh High Court (HC) judgment that had quashed the state government's decision to enhance the tuition fee in medical colleges to ₹24 lakh per annum, seven times the fee fixed earlier. While this news will come as music to the ears of parents, the fact is that higher education is expensive. An undergraduate degree in medicine from a private college can cost more than ₹50 lakh.

A post-graduate degree in management from a premier institute can cost between ₹20 lakh and ₹35 lakh. Even undergraduate degrees in law and liberal arts from highly ranked private institutes cost a packet. Given the high costs involved, parents must save and invest diligently for this goal.

Fix a target

Estimating the amount that will be required is difficult when the child is young. Costs vary widely across courses (professional or non-professional), colleges (government or private), and country (India or overseas).

"When the child is very young, parents must get an estimate of how much some of the major courses cost currently and fix a rough target. This estimate can be fine-tuned as the child grows and the goal becomes clearer," says Deepesh Raghaw, founder, PersonalFinancePlan, a Securities and Exchange Board of India-registered investment advisor.

Apply an inflation rate to the current fee. "Inflation in education is higher than the consumer price index-based inflation. Apply a 10 per cent rate," says Renu Maheshwari, a Sebi-registered investment advisor, co-founder and principal advisor, Finscholarz Wealth Managers.

Be conservative in your estimates so that you end up with a surplus rather than a shortfall.

Begin early

Financial planners say parents must start saving and investing for this goal early — from the day the child is born. "If you wait until clarity emerges on your child's education goal, it might be too late to gather an adequate corpus," says Harshad Chetanwala, co-founder, MyWealthGrowth.com.

Starting early makes the journey stress free. "The power of compounding works in your favour. You can arrive at your goal without taking too much risk in your investment portfolio," says Maheshwari.

When the child is young, parents may also be shouldering the burden of a home loan EMI. "Begin investing for the education goal with whatever amount you can set aside and try to increase your contribution by 10-15 per cent annually as your income grows," says Chetanwala.

Be aggressive

Build an aggressive portfolio for this long-term goal. "Depending on what your risk profile permits, opt for an 80:20 or 70:30 (equity:debt allocation) portfolio initially. Maintain this allocation during the initial years.

Reduce the equity allocation by 5-7 percentage points annually as you get closer to the goal," says Raghaw. Chetanwala suggests having the bulk of your portfolio in equity mutual funds via the systematic investment plan route.

The fixed income component can be built using the Public Provident Fund opened in the child's name (7.1 per cent tax-free return). Those who have a daughter can start a Sukanya Samriddhi Yojana account (7.6 per cent return tax-free). "On the fixed-income side, go with products that allow your money to compound. For instance, if you invest in fixed deposits (FDs), select the cumulative option," says Raghaw. Those in the 30 per cent and above tax brackets should prefer debt mutual funds over FDs if the goal is more than three years away (to avail of the indexation benefit on taxation). If your child intends to study abroad, a part of the corpus must be invested in international funds and gold to combat the rupee's tendency to depreciate against currencies like the US dollar.

DOs AND DON'Ts

- **Buy adequate term insurance so that child's education goal** is not compromised in case of an eventuality
- **Don't build a fixed income-heavy portfolio for education goal,** or else you could fall short due to high inflation in the cost of higher education
- **Fund whatever percentage of the cost of postgraduate education** you can without dipping into your retirement corpus
- **Encourage your child to work and save after undergraduate degree,** and take an education loan
- **Avoid child insurance plans;** many of them don't score highly on returns and cost
