Dear Sir/ Madam,

Sub: Press release

This is to inform you that “Cyient Selected by UK Power Networks to Develop an Outage Planning Portal.”

A copy of the press release in this regard is enclosed for your records.

Thanking you,

For Cyient Limited

N. Ravi Kumar

PRESS RELEASE

Cyient Selected by UK Power Networks to Develop an Outage Planning Portal

The solution will automate and improve how electricity networks manage planned upgrades and maintenance work, minimize network outages, and enable informed decision-making.

London, March 6, 2019: Cyient, a global provider of engineering, manufacturing, geospatial, networks, digital, and operations management solutions to global industry leaders, will execute a project for UK Power Networks, the UK's largest electricity distribution network operator. As part of the innovation project, called "Network Vision", Cyient will develop an online outage planning and tracking integration portal that will help optimize distributed energy generation performance and deliver cost savings of as much as £1 million per year.

Planning network downtime is a complex process that involves balancing competing factors, making it necessary to interrupt power supplies on parts of the electricity network so engineers can undertake maintenance, upgrades and other tasks safely.

Cyient's solution development team is working in collaboration with UK Power Networks to design and build the outage planning and tracking portal from the ground up. This will allow UK Power Networks to automate current processes and streamline how upgrades and maintenance tasks are scheduled.

Network Vision will give local energy generators - including renewable generation - visibility of planned work so they have the option to coordinate their own maintenance at the same time as the electricity network's maintenance operations, and so minimize downtime.

Reducing downtime helps maximise the potential of renewable energy to feed into local electricity networks and could enable an extra 1080 MWh of renewable generation per year, saving 344 tonnes of CO2 emissions. That's the equivalent effect of planting 172,000 trees (a forest 2.5 times the size of the City of London) every year.

John Renard, President of Utilities and Geospatial, and President of EMEA, Cyient said, "We are excited to be working with UK Power Networks on this innovative and revolutionary project that will enable utilities to change the way they manage their networks.

UK Power Networks has listened to what its stakeholders in the distributed energy community have said and responded with this project as a direct solution to their requests. It will give customers the ability to harmonize their plans with the network and ensure greater efficiency on network capacity."

Ian Cameron, head of innovation at UK Power Networks, said: "The rapid growth of renewable energy in recent years means that our customers are changing and want us to respond to the

needs they highlighted at our Distributed Generation Forums. We're excited to improve the service we offer them and to share our learnings so that all networks can also benefit."

About Cyient:

Cyient (Estd: 1991, NSE: CYIENT) provides engineering, manufacturing, geospatial, network, digital and operations management solutions to global industry leaders. Cyient leverages the power of digital technology and advanced analytics capabilities, along with their domain knowledge and technical expertise, to help clients solve complex business problems. As a Design, Build, Maintain partner that takes solution ownership across the value chain, Cyient empowers its clients to focus on their core, innovate, and stay ahead of the curve.

Relationships form the core of how Cyient works. With a client-centric approach and a workforce of more than 15,000 in 22 countries, Cyient combines global delivery with proximity to its clients to function as their extended team. Cyient's industry focus includes aerospace and defense, medical, telecommunications, rail transportation, semiconductor, utilities, industrial, energy and natural resources.
