PRESS RELEASE

Cyient Launches its Connected Equipment Offering for OEMs and Equipment Owners and Operators

~Combining advanced analytics, IoT connectivity and asset health monitoring, Cyient's offering will enable safer, smarter, and more reliable machines ~

Peoria, IL, February 18, 2019: Cyient, a global provider of engineering, manufacturing, geospatial, digital, network, and operations management solutions, has launched its Connected Equipment offering. The new service will provide original equipment manufacturers (OEMs), and equipment owners and operators with a combination of advanced analytics, IoT connectivity and asset health monitoring that will help increase equipment reliability, productivity, and operational safety, while decreasing operating expenses.

With this offering, Cyient will help its clients move from reacting to failures with costly, corrective maintenance to a proactive approach, using data for a more effective predictive maintenance process with prescriptive actions. Backed by its own best practices, Cyient's comprehensive connected equipment strategy employs IoT technology to capture machine-to-machine (M2M) equipment data, using connectivity to bring the data together. Cyient's data scientists design and integrate machine learning and artificial intelligence modules to analyze the data and provide real-time insights to help clients better monitor the health of their assets. As an experienced digital partner, Cyient can reduce costs and risks for industrial, heavy equipment, mining, and oil and gas companies by improving operational efficiency and personnel safety.

"With our Connected Equipment offering, Cyient builds upon its strong engineering capabilities to help our clients realize the benefits of leveraging digital solutions to make their equipment and operations safer, smarter and more efficient," explains Katie Cook, Senior Vice President, Industrial, Energy & Natural Resources BU at Cyient. "As a design, build and maintain partner, we work hand in hand with our clients to build long-term, comprehensive connectivity strategies that help them achieve sustained value and return on investment while maintaining a competitive advantage."

Visit <http://go.cyient.com/connected-equipment> to learn more about Cyient's Connected Equipment offering and the steps your organization should take to achieve operational efficiency, enhanced customer experiences, and new revenue streams.

About Cyient:

Cyient (Estd: 1991, NSE: CYIENT) provides engineering, manufacturing, geospatial, digital, networks, and operations management solutions to global industry leaders. Cyient leverages the power of digital technology and advanced analytics capabilities, along with domain knowledge and technical expertise, to solve complex business problems. As a Design, Build, and Maintain partner, Cyient takes solution ownership across the value chain to help clients focus on their core, innovate, and stay ahead of the curve.

Relationships form the core of how Cyient works. With more than 15,000 employees in 22 countries, Cyient partners with clients to operate as part of their extended team, in ways that best suit their organization's culture and requirements. Cyient's industry focus includes aerospace and defence, medical, telecommunications, rail transportation, semiconductor, utilities, industrial, energy and natural resources.
