Bandra Kurla Complex, Bandra (E),
Mumbai – 400051

Dear Sir/Madam,

Sub: Press Releases

We enclose herewith the press releases issued by the Company on the following matters:

1. Product Cooperation Agreement signed between the Company and L-3 Aviation Products Group
2. The Company to produce MADRAS (Modular Airborne Data Recording/Acquisition System) in India for L-3 Aviation Products Group

We request you to take the above on record.

Thanking you,

Yours faithfully,
For Centum Electronics Limited,

(Ellroy Furtado)
Company Secretary

Product Cooperation Agreement Signed Between Centum and L-3 Aviation Products Group

BANGALORE, February 7, 2011 – L-3's Aviation Products Group (L-3 APG) announced today that it has signed a product cooperation agreement with the Centum Group of Bangalore, India, to provide development and manufacturing services for certain L-3 aviation products at Centum's facilities in India.

"L-3 looks forward to building this relationship with Centum in India," said Denise Millard, vice president of international business development for L-3 APG. "India is an important supplier location and market for L-3, and we look forward to a successful launch of end-user product manufacturing there. We expect to capitalize on the strengths of Centum's extensive electronic design and dynamic manufacturing expertise to enhance our capability and capacity to produce complex aviation electronic products."

L-3 APG plans to add more product capability with Centum over time, and eventually collaborate with them on the development and design of products in India for both local and international aviation markets. United Aviation, Inc., an authorized Indian distributor for several L-3 divisions, played an important role in the integration of this activity between L-3 and Centum. Mr Paras Suri, Managing director of United Aviation said we have constantly sought to bring the most contemporary technology to India. While we have supplied HAL, the Indian Army, Air Force and Navy with Flight Data Recorders, Cockpit Voice Recorders and Traffic Collision and Avoidance Systems for several years and across several platforms, it has always been our vision to manufacture in India not just for India but also for the international market. To this effect, we are delighted to have partnered with Centum Electronics Ltd in Bangalore and have helped create an alliance between L3 and Centum. L3 Aviation Recorders are the world leaders in flight data recorder (FDR) technology. The FDR's complex technology is constantly evolving and L3's ability in maintaining its position as the world leader is accomplished by continually investing in research and development. Without this there would be no significant gains in size, weight and reliability in each new generation of recorders. L3's recorders fly on thousands of military fixed and rotary wing aircraft throughout the world including Blackhawk, Chinook, Kiowa, C130J and the Joint Strike Fighter. Through this agreement, Centum and the Indian aerospace now have access to the most contemporary leading edge technology.

"Centum is excited by this strategic relationship with L-3, a leading provider of aerospace and defense solutions," said Apparao Mallavarapu, managing director of Centum Group. "This partnership will enable Centum to widen its product and service portfolio in the aerospace and defense markets, and bring L-3's world-class products to the Indian market. L-3 can leverage Centum's local high-tech design and manufacturing capabilities to deliver products across international markets."

L-3 APG is comprised of four divisions: Aviation Communication & Surveillance Systems (ACSS) – an L-3 and Thales joint venture company, Avionics Systems, Aviation Recorders and Electrodynamics, Inc. L-3 APG's wide array of products for commercial and civil airframes includes traffic (TCAS) and terrain collision avoidance (TAWS) systems, weather mapping systems, voice and data recorders, and standby instruments for commercial and military airframes.

The Centum Group, located in Bangalore, India, provides high-technology design and manufacturing solutions to the Defence, Space & Aerospace, Medical, Industrial and Telecom markets with sixty percent of its revenues coming from global markets. Centum has four divisions, including a joint venture with Rakon, employs 1,200 people and is

listed on the National and Mumbai stock exchanges. For more information, please visit the company's website at www.centumindia.com.

Headquartered in New York City, L-3 Communications employs over 62,000 people worldwide and is a prime contractor in C^3ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and government services. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2010 sales of $15.7 billion. To learn more about L-3, please visit the company's website at www.L-3com.com.

Centum to Produce MADRAS in India for L-3 Aviation Products Group

BANGALORE, February 9, 2011 – L-3's Aviation Products Group announced today that its Modular Airborne Data Recording/Acquisition System (MADRAS) voice and data recorder will be the first L-3 product produced by the Centum Group for export back to the U.S., and will also provide L-3 with the capability to supply contemporary aviation recorder technology for the Indian market. This is part of a product cooperation agreement announced previously between the Bangalore, India-based company and L-3 Aviation Products Group (L-3 APG),

The MADRAS integrates voice and data recording with built-in data acquisition into a single-box solution for military and commercial aircraft.

"We're moving forward with plans to grow our presence in India," said Mike Smith, president of L-3 Aviation Recorders, one of the four divisions that comprise L-3 APG. "To properly supply the Indian market and maintain our position as the leader in flight data recorders, we need to manufacture our products in-country, and the MADRAS is just the first. With this relationship, we are leveraging India's fast-growing knowledge-base in aviation and technology to help us expand in India and internationally."

Paras Suri, managing director of United Aviation, the authorized India distributor for several L-3 divisions, played an important role in the coordination and integration of this activity between L-3 and Centum. L-3 Aviation Recorders will continue to look to the team at United as its longtime technical support provider in country, to provide ongoing assistance and guidance during this activity.

"Centum is excited at the speed with which this association with L-3 is progressing, and we are pleased to announce the launch of MADRAS production," said Apparao Mallavarapu, managing director of Centum Group. "This product launch is the first step towards Centum widening its product and service portfolio in the aerospace and defense markets and bringing more world-leading L-3 products to the Indian market."

L-3 APG is comprised of four divisions: ACSS – an L-3 and Thales joint venture company, Avionics Systems, Aviation Recorders and Electrodynamics, Inc. Its wide array of products for commercial and civil airframes includes traffic (TCAS) and terrain collision avoidance (TAWS) systems, weather mapping systems, voice and data recorders, and standby instruments. The MADRAS is an L-3 Aviation Recorders product.

L-3 is exhibiting at Aero India 2011 in the U.S.-Indian Partnership Pavilion, February 9-13: Hall E, Space E15a. Centum has MADRAS and other products on display at Aero India in Hall D, Space 3.

The Centum Group, located in Bangalore, India, provides high-technology design and manufacturing solutions to the Defence, Space & Aerospace, Medical, Industrial and Telecom markets with sixty percent of its revenues coming from global markets. Centum has four divisions, including a joint venture with Rakon, employs 1,200 people and is listed on the National and Mumbai stock exchanges.
