In September, UPI blocks the trend to register highest-ever volume

YUVRAJ MAJIK
Bangalore, 1 October

After a few months of tepid volume, the government-owned Unified Payments Interface (UPI) is back on the growth trajectory.

Both volumes, as well as the total value of transactions made over the digital payments interface, have grown over the last three months, recording the highest-ever numbers last month.

In September, UPI recorded 955.02 million transactions worth ₹1.61 trillion. This is 4 per cent higher in terms of volume and 4.5 per cent more in terms of value over August, when the corresponding numbers stood at 918.35 million and ₹1.54 trillion, respectively. The UPI platform came into being in August 2016. Data from National Payments Council of India (NPCI), which manages UPI, shows that the numbers are steadily rising since June. This comes as a positive sign as the volumes had declined month-on-month between March and May.

ON GROWTH PATH

Source: NPCI

The latest numbers may be seen as an indicator that consumer economic activity is steady despite an overall slowdown in the economy. India's GDP growth rate has fallen below 6 per cent. While consumer spending has dropped in the automobile sector, the telecommunications industry's debt is ballooning and Indian banks are battling against bad loans.

However, the trend may also mean that more and more transactions are happening digitally, instead of cash transactions, which do not conclusively point to the fact that consumption is rising.

In digital payments, a host of players are expanding the ecosystem and acceptance of mobile payments. Players like PhonePe, Google Pay, Paytm, and half a dozen others are offering incentives and cash backs to consumers for paying through their apps.

Banks have also come forward to launch UPI over their own banking applications. Also, under the UPI 2.0 framework, people can now subscribe to initial public offerings (IPOs) through UPI, a feature that is now being rolled out selectively and will be in the recent IPO of Aflie.

A major push behind digital payments is by the government itself. In the 2019 Union Budget, the Centre announced that certain business called MDR (merchant discount rate) if they accept payment over digital means, including the UPI. This had led to a lot of retailers and supermarket chains to make the UPI and card payments at their cash counters.

According to reports, the government is also planning to incentivise the use of QR codes (used for UPI payments) by offering merchants tax incentives.

Only 7% taxpayers will be required to submit monthly GST returns

DILASH SETH
New Delhi, 1 October

About 93 per cent of the goods and services taxpayers will be relieved of monthly return filing once the new simplified return system comes into effect from April 2020. The new return system will not only make compliance easier for businesses, but also plug leaks with respect to input tax credit claims.

Prakash Kumar, chief executive officer, Goods and Services Tax Network (GSTN), the technology backbone of India's indirect tax regime.

The new return system requiring fewer details was earlier expected to be introduced from October, but the GST Council in its last meeting held in Goa decided to postpone it to April 1, 2020, to give time to taxpayers to adapt to the new system.

WTO cuts global trade growth forecast to 1.2%

Press Trust of India
New Delhi, 1 October

The World Trade Organisation (WTO), on Tuesday, cut global trade growth forecasts for 2019 to 1.2 per cent, from the earlier 2.6 per cent, mainly due to trade tensions and sluggish global economy.

This growth projection will not auger well for India, as it is struggling to increase its exports.

"Escalating trade tensions and a slowing global economy have led WTO economists to sharply downgrade their forecasts for trade growth in 2019 and 2020," the organisation said in a statement.

World merchandise trade volumes are now expected to rise by only 1.2 per cent in 2019, substantially slower than the 2.6 per cent growth forecast made in April.

It added that the global trade growth is projected to grow at 2.7 per cent in 2020, down from the previous projection of 3 per cent.

"Forecast risks are heavily weighted to the downside and dominated by trade policy. Further rounds of tariffs and retaliation could produce a destructive cycle of rearmament," the WTO said.

WTO Director-General Roberto Azevedo said the darkening outlook for trade is discouraging but not unexpected.

"Job creation may also be hampered as firms employ fewer workers to produce goods and services for export," he said, adding "resolving trade disagreements would allow WTO members to avoid such costs".

India's exports dropped by 6.05 per cent to \$26.13 billion in August mainly on account of significant dip in shipments from key sectors. Imports too declined by 1.345 per cent to \$39.58 billion, narrowing trade deficit to \$13.45 billion in August, according to the commerce ministry data.
