Wipro Collaborates with Check Point Software to Offer Cloud Security Services

Partnership to deliver advanced cyber security and threat prevention solutions to maximize customer investment in cloud infrastructure

San Carlos, Calif. and Bangalore, India – November 5, 2018: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading global information technology, consulting and business process services company today announced a new partnership with Check Point Software Technologies Ltd, a leading provider of cyber security solutions globally, to deliver Check Point's advanced and dynamic cloud security solution, CloudGuard IaaS.

This strategic worldwide partnership will further accelerate demand for the CloudGuard comprehensive suite of cloud security products, which are focused on advanced threat prevention and safeguarding enterprise cloud applications, infrastructure, and data against the most sophisticated [fifth-generation cyber-attacks](#) threatening organizations today. CloudGuard already protects more than 2,000 enterprise cloud environments.

Cloud security is a shared responsibility between the service provider and the customer, which can be a challenging model to implement. Through this partnership, Wipro and Check Point are enabling customers to maximize their investment in cloud infrastructure by defending against the most sophisticated fifth-generation cyber security threats to their cloud assets and data.

Key features of Check Point CloudGuard IaaS include:

- Automated and dynamic policy: CloudGuard absorbs and leverages contextual information about the infrastructure to automatically adjust security policies to any changes in the cloud environment.
- Centralized management: With the Check Point Unified Security Management solution, users can enforce a consistent security policy for all corporate assets across both the public cloud and on-premise infrastructures – all from a single console.
- Rapid deployment: CloudGuard can be deployed in minutes, supporting both pay-as-you-go and –bring-your-own-license pricing models.
- Consolidated logs and reporting: CloudGuard dramatically simplifies compliance and audits by unifying threat visibility for hybrid cloud environments and enhancing forensic analysis.

Sheetal Mehta, Senior Vice President & Global Head of Cybersecurity & Risk Service, Wipro Limited, said, "I am excited about what our partnership with Check Point can bring to our joint customers. We have a shared vision of helping our customers secure their cloud workloads and assets, and our capabilities complement each other. By incorporating Check Point's cloud

security solutions into our IaaS offerings, Wipro customers will now benefit from advanced fifth-generation threat prevention for virtualized cloud deployments and enterprise edge applications.”

Itai Greenberg, Vice President of Product Management, Check Point, said, “Enterprises increasingly want to realize the flexibility, agility, and scalability that the public cloud has to offer while incorporating deployments into their existing network infrastructures. The Check Point CloudGuard family enables organizations to do so securely and consistently, delivering comprehensive threat prevention for cloud-based IaaS and SaaS applications and infrastructure workloads. We look forward to working with the hundreds of certified Check Point engineers and cloud experts at Wipro to bring these benefits to our mutual customers and keep them one step ahead of the modern threat landscape.”

About Wipro Limited

Forward-looking and Cautionary Statements

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property, and general economic conditions affecting our business and industry. Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
