Wipro launches Industrial Internet of Things Centre of Excellence in Kochi

Kochi, India, March 14, 2019 – Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading global information technology, consulting and business process services company, today announced the launch of its Industrial Internet of Things (IIoT) Centre of Excellence (CoE) in Kochi, India.

The CoE marks Wipro's commitment to developing innovative IIoT solutions that span across the technology stack for its customers in the industrial manufacturing, automotive, healthcare and pharmaceutical, consumer products and goods, and utilities space. Leveraging artificial intelligence, blockchain and robotics, the lab will develop Proofs of Concept (POCs) and market-ready IoT solutions in an iterative agile development model.

M. Sivasankar, IT Secretary, Government of Kerala, who inaugurated the centre said, "Congratulations to Wipro on setting up an IIoT lab in Kochi. Kerala has focused on technologies, which are critical to the Industry 4.0 concept and IoT is an integral part of this proposition. The State has endeavoured to address skill-related issues in emerging technology areas including IIoT by fostering a vibrant hardware-based start-up ecosystem and a skilling framework that connects technical institutions. With the rollout of the Kerala Fibre Optic Network (KFON), the ambitious fibre2home/enterprise/institution network in the next 18 months, local economy stakeholders will increasingly benefit from IoT deployments. So, Wipro's decision to set up its third global IIoT lab in Kerala is a timely one and I hope it grows into a major development centre in a short period of time."

Separately, Wipro hosted a two-day hackathon on Industrial IoT from March 12 to March 13 at its Kochi development centre, which saw active participation from leading engineering colleges in Kerala. Wipro will extend pre-placement offers to the winning participants in the final year of their engineering degree course while those in the penultimate year of their degree program will receive internship opportunities. The new hires will join Wipro's IIoT research and development team in Kochi.

Jayraj Nair, Vice President & Global Head - IoT, Wipro Limited said, "We are proud to launch our Industrial IoT Centre of Excellence in Kerala, our third such centre after Mountain View, California and Bangalore. Over the years, Kerala has grown into a technology hub that offers access to a dynamic talent pool with an aptitude for new-age technologies. IoT presents a huge opportunity for industries in a hyper-connected world and we are confident that our end-to-end services and offerings will help our clients leverage IoT as part of their digital transformation goals."

By combining its services and offerings across engineering, analytics, consulting and applications with domain expertise in specific industry verticals, Wipro offers comprehensive engineering solutions for IoT adoption. These range from sensors, connectivity, edge

computing, storage, artificial intelligence, machine learning and analytics. Wipro also leverages its partnership ecosystem, which spans across edge, connectivity, application enablement platforms, applications, business solutions, infrastructure, and cloud partners to ensure the best outcome for its clients' IoT programs.

About Wipro Limited

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 170,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.

Forward-looking and Cautionary Statements

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property, and general economic conditions affecting our business and industry. Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
