**Subject: Media Release for securing major ₹ 33.46 Crore Government Cybersecurity Order from National Informatics Centre (NIC)**

Dear Sir/Madam,

DC Infotech and Communication Limited is pleased to announce that it has secured a significant order worth ₹33.46 Crore from the National Informatics Centre (NIC) for the prestigious National Knowledge Network (NKN) Project.

The project involves the deployment of a comprehensive network security and monitoring solution designed to protect critical digital infrastructure. This solution will continuously monitor network traffic, detect unusual or suspicious activities, and help identify cyber threats at an early stage. It is particularly equipped to detect and mitigate Distributed Denial of Service (DDoS) attacks that can disrupt essential services, analyse attack patterns, and block malicious traffic in real time.

The solution is powered by globally leading cybersecurity technologies deployed and integrated by DC Infotech, ensuring high performance, scalability, and reliability for mission-critical environments.

In addition, the system will provide intelligent alerts and actionable insights, enabling rapid response by network teams and ensuring that critical services remain secure, stable, and uninterrupted.

The overall scope of the order includes software licenses, deployment of advanced detection and mitigation hardware, implementation of an analytics platform, as well as implementation services, training, support, and other related components required to deliver an end-to-end cybersecurity solution.

This order marks a significant milestone for DC Infotech and reinforces its strong positioning in the government and public sector space. This engagement further strengthens the Company's focus on high-value cybersecurity solutions, contributing to an improved business mix and long-term growth visibility. It highlights Company's growing role in strengthening cybersecurity frameworks for large-scale, mission-critical environments and its capability to deliver advanced, high-performance network protection solutions.

**Management Comment:**

*“We are proud to partner with NIC on the National Knowledge Network Project, which is a critical initiative for India’s digital ecosystem. This order reflects our deep expertise in cybersecurity and our ability to deliver robust, scalable solutions for highly complex environments. We remain committed to supporting the Nation’s digital infrastructure with cutting-edge technology and trusted execution.*

*This also represents one of the largest cybersecurity engagements for the Company in the government segment.*

*The National Knowledge Network is a key initiative aimed at enabling secure, high-speed connectivity across academic, research, and government institutions in India. DC Infotech’s solution will play a vital role in ensuring the resilience and security of this critical network infrastructure.*

*With this development, DC Infotech continues to strengthen its cybersecurity portfolio and expand its footprint in delivering advanced solutions for critical infrastructure protection.”*

Thanking you  
**For DC Infotech & Communication Limited**
