PAT	89.14	61.70	44.48%	(7.22)	
PAT Margin (%)	**29.46%**	**28.98%**			

Commenting on the performance, **Mr. Paras S. Savla, Chairman and Managing Director, Deep Industries Ltd.** expressed Deep Industries Ltd has begun FY27 with remarkable momentum, building on our strategic achievements and operational excellence. This quarter we have secured key contracts for HP Compression of lift gas at Assam, and Contract for Charter hiring of natural gas compression services at Ahmedabad along with various other contracts strengthening our diversified portfolio.

The global energy landscape is undergoing a pivotal shift. What we are seeing today is the beginning of a structural rebalancing across global energy supply chains. Driven primarily by Asian economies, global oil demand is projected to rebound sharply through FY27. However, the overarching theme across boardrooms is clear - Energy Security over short-term expediency.

As a leader covering over 70% of the post-exploration service value chain spanning gas compression, gas dehydration, gas processing facilities, Workover Rigs Services, Drilling Rig Services, Integrated Project Management Services, Production Enhancement services and offshore support these macro shifts and policy overhauls act as direct structural tailwinds for our core business.

These milestones, combined with robust activity across our core segments, underscore our commitment to deliver innovative, value-driven solutions. With a strong order book, efficient execution, favorable policy environment and rising energy demand, we are well positioned to drive sustainable growth and create long-term value for our stakeholders. As we move forward, our commitment to rigorous corporate governance and uncompromising safety standards remains our guiding priority.

About Deep Industries Ltd.

Deep Industries Limited is a one stop solution provider in the business of various Oil and Gas support services for more than 30 years now. It had started with Natural Gas Compression services in 90's and have added various services like natural gas dehydration, Drilling and workover rigs, Integrated project management and Charter Hiring of Gas processing services. Its current Service portfolio covers more than 70 percent of post exploration value chain services. Services like Integrated Project Management and Charter hiring of Entire Gas processing facility forms part of its value-added offerings. This is a unique proposition offered by the Company converting EPC business into charter hire. After entering into Production Enhancement Contract with ONGC, company has successfully commenced production operations. This initiative marks a significant milestone in company's efforts to contribute to India's energy security through the efficient development of existing oil and gas fields.
