Sub.: General Corporate Announcement under Regulation 30 of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") – Strategic PSU Contract and Pan-India Expansion of MDC Footprint

Dear Sir / Madam,

With reference to the Regulation 30 of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") and above-mentioned subject, we are pleased to inform that Delaplex Limited has achieved a significant milestone in its strategic growth journey towards decentralizing India's digital infrastructure.

Delaplex Limited, a global technology and software development company and an empaneled Data Center Service Provider (DCSP) with BSNL, today announced a major leap in its mission to decentralize India's digital infrastructure. Following its national empanelment as a **Data Center Service Provider (DCSP)** with Bharat Sanchar Nigam Limited (**BSNL**), the company has officially commenced the rollout of its innovative **Micro Data Center (MDC)** services across India's major metro cities.

### **1. The Innovation: Delaplex Micro Data Centers (MDC)**

At the heart of this expansion is Delaplex's proprietary MDC technology. Unlike traditional hyperscale data centers, these modular units are designed for **Edge Computing**. They provide Class 4 data center compliance, robust security, and high-performance computing right at the source of data generation. This drastically reduces latency, making it ideal for real-time AI applications, 5G services, and secure enterprise workflows.

### **2. Strategic BSNL Empanelment: A National Catalyst**

As an Empaneled DCSP with BSNL, Delaplex is leveraging the telecom giant's vast existing real estate and connectivity across various "Circles." This public-private collaboration allows Delaplex to deploy MDCs with unprecedented speed, utilizing BSNL's secure premises to offer localized, cost-effective digital infrastructure to businesses of all sizes.

### **3. Pan-India Rollout: From Hyderabad to Metro Hubs**

The journey began with a successful pilot in the **Gachibowli, Hyderabad** retail market, where Delaplex established a strong foothold by serving local Insurance and IT firms. Building on this momentum, the company is now activating its MDC network across multiple Indian metros, ensuring that high-speed data processing is available to urban business clusters nationwide.

#### **4. Milestone Win: Powering Data Center for a Public Sector Bank**

Marking a significant entry into the Public Sector Undertaking (PSU) and Banking space, Delaplex, via its partnership with BSNL, has secured a prestigious contract with the **one of the largest PSU Bank of India**. The company will provide MDC services to Bank's IT department in Mumbai with an **initial commitment of 3 Years**, reinforcing Delaplex's role as a trusted Partner for High-Security financial data

#### **5. Milestone Win: Powering Data Center for Government offices in Pondicherry**

Another significant win for Delaplex comes as contract for Cloud Infrastructure Services for Computerization of Office under Pondicherry Government. The order is expected to evolve into a multi-year contract with a potential to cover multiple departments within the same data center for multiple applications.

#### **6. Positive Outlook: Growing Pipeline**

With this landmark contract win with one of India's largest PSU banks as a flagship success, the Company's strategic investments in the data center and MDC space built on its deep technology and software capabilities are beginning to deliver measurable outcomes, with initial returns now becoming visible. Delaplex reports a robust and growing pipeline of MDC and data center engagements spanning multiple BSNL circles, with accelerating interest from enterprises, PSUs, and financial institutions seeking secure, localized edge computing solutions. Revenue from projects currently in advanced stages of the pipeline is expected to flow in the near term, reinforcing management's confidence in the Company's ability to convert its growing order book into sustained financial performance.

#### **7. The DPDP Advantage: Compliance as a Growth Driver**

The enforcement of India's **Digital Personal Data Protection (DPDP) Act** has become a significant tailwind for Delaplex. As organizations move to ensure data sovereignty and localized storage, the Delaplex MDC model offers a "ready-to-use" compliance framework. "Our MDCs are uniquely positioned to help Indian enterprises navigate the DPDP landscape," said **Nitin Sachdeva, Managing Director, Delaplex Limited**. By keeping data local and secure within our Edge units, we provide the ultimate peace of mind for Data Fiduciaries across the country.

*"As a global technology and software development company, we have always looked for opportunities to deploy our capabilities where the demand is most compelling. The data center and edge computing space represents exactly that and the investments we have made here are now beginning to yield measurable results, with initial returns becoming visible. Our pipeline is strong and growing across multiple geographies, and we expect revenue from several advanced-stage engagements to flow in the next quarter. The recent wins for our data center services is a meaningful proof point, and we are confident that our technology depth, combined with the scale of the BSNL partnership, positions us well to be a significant participant in India's data center infrastructure buildout," said **Nitin Sachdeva, Managing Director, Delaplex Limited**.*

**About Delaplex Limited:** Delaplex Limited is a global technology consulting and software development company. Listed on the NSE SME Emerge, the company specializes in Cloud solutions, AI, and Supply Chain consulting, and is building a rapidly growing data center infrastructure practice through the deployment of its proprietary Micro Data Center (MDC) technology helping enterprises derive measurable value through secure, localized, and edge-first digital infrastructure. With a presence across three continents, Delaplex has established a strong operational footprint and maintains strategic partnerships with leading organizations

This is for your information and record.

Thanking you, Yours faithfully

For Delaplex Limited
