Press Release

January 28, 2026

Delta Autocorp strengthens New Product Development function with the appointment of Mr. Mintu K. Saini as Assistant General Manager – NPD

Deltic bolsters its New Product Development (NPD) function by onboarding industry veteran Mr. Mintu K. Saini, who joins the Company as Assistant General Manager, New Product Development (AGM – NPD), to lead two-wheeler development initiatives focused on building ground-up electric scooters designed for Greater India's diverse needs, aspirations, testing conditions, and real-world driving environments.

Mr. Saini brings 17 years of experience and has led end-to-end product development across multiple EV OEM projects, spanning concept creation, engineering execution, and production readiness. At Deltic, his role will focus on advancing purpose-built two-wheeler platforms on which future generations of scooters will be engineered for Indian operating realities, while balancing functionality, durability, and affordability.

Prior to joining Deltic, Mr. Saini was associated with OPG Mobility and Power Private Limited (Okaya EV) as R&D Project Head for two-wheeler and three-wheeler programs, and earlier with Revolt Motors as R&D Project Head. Across these assignments, he played a key role in delivering complete vehicle programs, covering design development, prototyping, tooling, SOP-based product development, and homologation, while working closely with cross-functional teams and external stakeholders.

The addition of Mr. Saini further strengthens Deltic's focus on new product development and R&D, which the Company views as critical long-term differentiators. Backed by years of in-house research, market learning, and growing engineering depth, Deltic remains committed to building electric scooters that are purpose-driven, accessible, and relevant for Bharat, positioning product development excellence as a key winning factor over the long term.
