- 31. Overview of the entity's material responsible business conduct issues.** (Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.)

S. No.	Material issue identified	Indicate whether Risk (R) or Opportunity (O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity
1	GHG emissions and carbon emissions	R	In the IT and BPM sector, data centers and electronic devices are used. The operation of this equipment is an energy-intensive activity and generates significant direct and indirect greenhouse gas (GHG) emissions, including carbon dioxide and methane from fuel use. Uncontrolled pollutants, emissions and associated activities impose legal and environmental risks for the company.	Leveraging cloud and other Green IT technologies, implementing energy efficient lights helps us to reduce our carbon footprint.	Negative Implications
2	Energy management	R	Energy management can be a potential risk for various companies. In the context of an IT company, energy management risk can be significant due to the high energy consumption of data centers and other IT infrastructure. Similarly, IT companies may be vulnerable to disruptions in the energy supply chain, such as power outages or fuel shortages, which can impact the availability and reliability of their IT systems. Also many countries and regions have environmental regulations that impose restrictions on energy consumption and carbon emissions. Failure to comply with these regulations can result in fines and other penalties.	Our strategies include using green technologies such as cloud, to further reduce our environment footprint and impact along with usage and promotion of third-party renewable energy sources.	Negative Implications
3	Human Rights	R	Companies focusing on respecting human rights demonstrate their commitment to building sustainable and mutually beneficial relationships with those who are influenced or impacted by their operations, such as customers, communities, workers, and investors. This includes demonstrating that they care about the people whose lives they engage with.	Develop clear policies and guidelines that governs the human rights. Establishment of confidential reporting channel for the employees to report human rights concerns.	Negative Implications
4	Employee Engagement, Diversity & Inclusion	O	A company's high diversity and inclusion rate reflects employees' sense of belonging and fairness within the Company. Improving diversity and inclusion helps companies to support vulnerable groups resulting in community brand image creation for the company.	Our strategies include implementing policies to prevent discrimination, fostering a culture of respect and inclusivity, and promoting diversity in hiring practices. This enables us to be bring many diverse ideas and cater to larger set of clients.	Positive Implications

5	Customer responsibility and Satisfaction	O	Customer satisfaction is a key indicator of success. A poor customer experience relationship can pose a risk of loss of existing customers or decrease in customer loyalty. Similarly, loss of customers and damage to reputation can lead to decline in sales and revenue.	Organization uses matrix and data to track customer satisfaction and identify area of improvement.	Positive Implications
6	Employee well-being and health	R	Employee wellbeing is one crucial risk for the company. BPM companies often deal with complex and high-volume workloads, leading to a high-stress work environment for employees. Jobs in IT and BPM require sitting for extended periods, leading to a sedentary lifestyle that can lead to various health problems and sometimes experience mental health issues such as anxiety, depression, and stress due to workload pressure.	Employee wellness is a top priority of Datamatics. Some of our strategies include implementing safety protocols, providing access to healthcare resources, and promoting healthy lifestyles for all employees.	Negative Implications
7	Talent Attraction & Retention	O	Talent attraction and retention is a significant risk for BPM and IT companies due to the highly competitive nature of the industry and the demand for specialized skills. Similarly, BPM companies may experience high turnover rates due to factors such as job dissatisfaction, lack of career growth opportunities, and inadequate compensation and benefits.	Our strategies include providing employees with opportunities for professional development and education, as well as creating a diverse and inclusive workforce culture.	Positive Implications
8	Service quality and delivery	O	BPM companies can leverage service quality and delivery to gain a competitive edge in the industry, build customer loyalty, and increase revenue. BPM companies can optimize their processes to ensure efficient and effective delivery of services. This can include using automation, process mapping, and continuous improvement methodologies.	Our organization work on standardizing processes to ensure consistent quality and timely delivery of services. We focused on understanding the needs and expectation of our customer, aligning processes to deliver services that meet or exceed those expectations.	Positive Implications
9	Community Giving	O	Environmental policy, community health, and process safety have significant regulatory, operational, financial, and reputational ramifications for companies. Building strong relationships with communities can help companies to mitigate potential operational disruption, reduce regulatory risk, retain top employees, lower the risk of litigation expenses in the event of process safety incidents, and ensure a strong social license to operate. Process safety incidents jeopardise community health and safety, resulting in regulatory penalties, legal action, and mitigating expenses.	Our strategies include engaging in philanthropic initiatives, supporting local businesses, volunteering employee time and promoting economic development. Increasing community activity enables us to create future Datamatics first-class employees.	Positive Implications
10	Data Privacy & Cyber Security	R	Companies are assessed based on the amount of personal data they collect, their exposure to evolving or increasing privacy regulations, their vulnerability to potential data breaches, and their data protection systems.	We have implemented a robust set of security measure and controls to protect against cyber threats and safeguard and protect sensitive data of Datamatics and our clients.	Negative Implications

11	Training and development	O	Training and development are essential to the success of any IT and BPM organization. Companies that invests in employee training and development can increase their competitiveness, improve their workforce's skills and knowledge, and promote a culture of continuous learning and development.	The Company offers various learning and training program to its employees. It helps employees to leverage on all the new technology courses & learnings. Datamatics partners with FutureSkills Prime (FSP), a first of its kind government & Industry partnership to drive a national skilling ecosystem for digital technologies (Geo- India).	Positive Implications
12	Ethics and compliance	R	The key issue relevant to business ethics and management of business ethics issues such as fraud, executive misconduct, corrupt practices, money laundering, or anti-trust violations. Ethics violations can lead to police investigations, hefty fines, settlement costs, and damage to reputation.	Our intention and ambition are to operate ethical under all circumstances. Our strategies to mitigate include establishing a code of conduct, implementing compliance and ethic straining programs, and holding employees accountable for ethical violations.	Negative Implications
13	Corporate governance	R	Businesses are assessed based on their performance across all key governance issues, which include ownership & control, Board pay, accounting, business ethics, and tax transparency. This topic examines the effect that a company's corporate governance and business ethics practices have on its shareholders and other investors.	Our strategies include implementing ethical and transparent business practices, establishing effective risk management strategies, and ensuring compliance with regulatory requirements.	Negative Implications

Governance, leadership and oversight

7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements. (Listed entity has flexibility regarding the placement of this disclosure.)

At Datamatics, we believe that sustainable business practices are integral to long-term value creation and resilience. As businesses navigate an increasingly dynamic regulatory and stakeholder landscape, embedding Environmental, Social and Governance (ESG)

principles into strategy and operations is no longer optional. Our ESG journey is guided by responsible governance, operational excellence, innovation, and a commitment to creating lasting value for our customers, employees, investors, communities, and the environment.

During the year, we made meaningful progress in strengthening our ESG framework while laying the foundation for long-term sustainability goals. A key milestone has been our commitment to the Science Based Targets initiative (SBTi), with Scope 3 emissions inventorisation nearing completion and greenhouse gas emission reduction targets planned for submission for SBTi validation during FY 2026–27. We have also strengthened our carbon accounting processes by streamlining Scope 1 and Scope 2 data management and expanding the assessment of material Scope 3 emission categories, enabling better visibility into our environmental footprint and supporting data-driven decarbonization efforts.

Recognizing that sustainability requires cross-functional ownership, we have established an ESG Committee to guide strategy, oversee implementation, and monitor progress across environmental, social, and governance priorities. We continue to advance initiatives focused on energy efficiency, responsible resource management, environmental conservation, employee wellbeing, community development, ethical governance, and regulatory compliance. At the same time, we are enhancing transparency through robust ESG disclosures, digital ESG analytics, and active stakeholder engagement.

As our sustainability journey evolves, we also acknowledge the challenges ahead. Improving the availability and quality of value chain data, strengthening supplier engagement, advancing emissions reduction across Scope 3 categories, and responding to evolving ESG regulations will remain key focus areas. We view these challenges as opportunities to build greater resilience, foster innovation, and strengthen collaboration across our value chain.

Looking ahead, our priorities include obtaining validation of our science-based climate targets, enhancing our ESG reporting and disclosures, leveraging digital technologies for improved ESG performance management, and further integrating sustainability into business decision-making. Through these efforts, we remain committed to creating sustainable value for all stakeholders while contributing meaningfully to global environmental and social priorities.

Construction and demolition waste (D)	0	0
Battery waste (E)	0	0
Radioactive waste (F)	0	0
Other Hazardous waste. Please specify, if any (G)	0	0
Other Non-hazardous waste generated (H). Please specify, if any	81.26	90.98
Total (A+B+C+D+E+F+G+H)	97.91	99.48
Waste intensity per rupee of turnover (tonne/₹ turnover)	0.0000000146	0.0000000140
Waste intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (tonne/US\$ turnover)	0.000000297	0.000000285
Waste intensity in terms of physical output	-	-

b. For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)

Parameter	FY 2025-26 (Current Financial Year)	PY 2024-25 (Previous Financial Year)
Category of waste (in metric tonnes)		
(i) Recycled	4.18	9.13
(ii) Re-used	0	0

Parameter	FY 2025-26 (Current Financial Year)	PY 2024-25 (Previous Financial Year)
Other recovery operations	0	0.94
Total	4.18	10.07

c. For each category of waste generated, total waste disposed by nature of disposal method (in metric tonnes)

Parameter	FY 2025-26 (Current Financial Year)	PY 2024-25 (Previous Financial Year)
Category of waste (in metric tonnes)		
(i) Incineration	0	0
(ii) Landfilling	93.73	89.2
(iii) Other disposal operations	0	0.21
Total	93.73	89.41

d. Details about any independent assessment/evaluation/assurance by an external agency:

Questions	Response
Indicate if any independent assessment/evaluation/assurance has been carried out by an external agency?	No

b. If not, provide details of all such non-compliances, in the following format:

We are compliant to all applicable environmental laws/regulation guidelines in India.

Leadership indicators**1. Details of water withdrawal, consumption and discharge in areas of water stress (in kilolitres):**

Not Applicable, as Datamatics doesn't operate in areas of water stress.

2. Details of total scope 3 emissions & its intensity.**a. Whether total Scope 3 emissions & its intensity is applicable to the company?**

Yes

b. Please provide details of total scope 3 emissions & its intensity, in the following format:

Parameter	Unit	FY 2025-26 (Current Financial Year)	FY 2024-25 (Previous Financial Year)
Total scope 3 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	tCO ₂ e	292.61	378.67
Total scope 3 emissions per rupee of turnover	tCO ₂ e/₹ turnover	0.0000000435	0.0000000533
Indicate if any independent assessment/evaluation/assurance has been carried out by an external agency?	-	No	
If yes, name of the external agency.	-	NA	

3. With respect to the ecologically sensitive areas reported at Question 11 of essential indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

Not Applicable, as Datamatics doesn't operate in or near by any ecological sensitive area.

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

S. No.	Initiatives undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Installed sensor based urinals, pressmatic taps and tap aerators	Installation of sensor-based urinals, pressmatic taps, and tap aerators in washrooms to regulate and optimize water usage	Significant reduction in water consumption and associated energy used for water supply and treatment.
2	Waste management practices and circular economy	Implementation of waste segregation at source (wet waste, garden waste, sanitary waste), recycling of e-waste, metal, paper, and sanitary waste, and reuse of packing materials.	Increased recycling rates, reduced landfill waste, and minimized environmental impact from waste disposal.
3	Sustainable consumption & procurement	Transition to eco-friendly products such as recycled toilet paper	Reduced environmental footprint from procurement activities
4	Repair and maintenance optimization	Adoption of a repair-over-replacement approach supported by in-house technicians for maintenance of furniture and appliances.	Extended asset life, reduced material consumption, and lower waste generation.

5. Details about the disaster management plan.**a. Does the entity have a business continuity and disaster management plan?**

Yes

b. Give details in 100 words/ web link.
