You are requested to kindly take the same on your record.

Thanking you,

For, Dharmaj Crop Guard Limited

**Malvika Bhadreshbhai Kapasi**  
**Company Secretary & Compliance Officer**  
**A52602**

Encl.: As above

## FROM THE FRONT PAGE

## ‘Trying to address 20-year legacy’

Sebi has tightened scrutiny on exchanges' tech infrastructure, with the Standing Committee on Technology tasked with ensuring compliance? Is that a drag on the bourses?

What the regulators are trying to do is ensure and address probable tech glitches and bring in as much management attention to technology. Today, exchanges have become technology factories. Sebi's intention is not to be a drag on the exchange but rather augment the capabilities of the exchange.

The BSE has among the most superior tech in terms of trading infrastructure — set up long back with the help of Deutsche Börse — which is globally recognised for its speed, robustness, and architectural capability for scaling up. We don't see it as a challenge as the regulators have been supportive.

Is the surge in the number of people flocking towards options trading, even when nine out of 10 make losses, a worrying sign?

Using any product mindlessly without understanding its features is a worrisome sign. Therefore, what we need the most is investor education. Market infrastructure institutions (MIIs) should explain the non-linear nature of options to the investing public. It can't be thought of as a low-priced stock or a lottery ticket.

People have the notion that if they invest ₹20, it could generate say ₹200 if things work out, and even if they lose, it will just be the ₹20. That's not the mindset to have while trading. Instead, invest in alternative products such as mutual funds.

One anticipates the market to gain and doesn't have sufficient money to invest in full. Buying an Option makes sense here, so they could reap the benefits when indices go up and won't be at a loss when going to the equity markets. On the other hand, if they wait for the markets to gain and then choose to invest, then they will be left with insufficient money. Hence, when used with understanding, Options can benefit retail investors too.

Has stopping the Liquidity Enhancement Scheme (LES) had any impact?

The LES was tried for a long time but it didn't bring in depth, nor did it address the ecosystem and infrastructure issues. If these don't get addressed, there won't be liquidity coming in, and hence it doesn't add value.

Once the ecosystem is sorted, there won't be any need for the LES. Where was an LES when the Nifty or Bank Nifty started?

Given that the BSE has a huge ground to cover in terms of market share in both the F&O and cash segments, what are the plans to shore up volumes?

I don't see myself competing with anyone but trying to create a vibrant exchange. Equity market volumes have been falling since the last one-and-a-half decades or two on the BSE, not over three or six months. Institu-

tional participation, FPIs' capability to participate, awareness that there should be at least two vibrant exchanges are factors we are working on to arrest the slide. We are doing well in currency futures and are making efforts in Options.

## IT winter freezes engg schools

Compared to 2022, new job openings for freshers in the IT sector, have dipped by almost 20% this year

According to him, compared to 2022, new job openings for freshers in the IT sector, have dipped by almost 20% this year. “Many IT services companies like Wipro have not visited our campus this year because of overhiring done earlier. Cognizant, DXC Technology, Capgemini have reduced their hiring numbers for 2023 batch compared to 2022. Cognizant, which hired about 350 in 2022, hired only 100 in 2023.

Similarly, DXC Technology, that hired 250 earlier, hired about 100 in 2023,” a placement and training officer of a Karnataka-based private university, said.

He added that the drop in placement at IT services companies has been somewhat compensated with hiring from other industries like banking and FMCG, but the numbers are very low as these industries don't need very high manpower.

Savitha Rani M, training and placement officer, Ramaiah Institute of Technology, Bengaluru, said that entry-level jobs are getting automated and students need to upgrade their skills to get hired in niche areas, where there are openings. Sunil C, CEO of TeamLease Digital, said that the decline in campus hiring has resulted in traffic surge to one of its job portal, Freshersworld.com.

“We are seeing an increase of 20-22% traffic on our website and this trend will further increase from the month of June,” he said. Human resources placement experts said that companies have identified upskilling as the key to market competitiveness and prefer professionals who are well versed with technologies like blockchain, cybersecurity, AI and ML. Due to the rapid pace of technological advancement and increased globalisation, the job market has become quite dynamic while being responsive to global market turbulence

## Growth, jobs to figure at Niti meet on May 27

PRASANTA SAHU  
New Delhi, May 15

PRIME MINISTER NARENDRA Modi will chair the eighth meeting of the Governing Council of Niti Aayog on May 27 to deliberate with chief ministers on a range of issues including growth and jobs, sources said. Broad themes such as crop diversification, MSME sector growth, education, agriculture and urban governance, are also likely to be discussed, sources said.

The meeting assumes importance after Modi's Bharatiya Janata Party lost assembly elections in Karnataka and a spate of assembly elections are slated by the end of 2023 before general elections in April-May 2024. The Centre would be broadly highlighting the government's mission of making India a developed nation by 2047, the 100th year of Independence. Besides placing their demands, state chief ministers, especially from opposition-ruled states are likely to present their views on the Centre-state relations, and issues with regard to central schemes.

India's aim of achieving a \$5 trillion economy by FY26 or thereabout from \$3.5 trillion in FY23, requires a compound annual growth rate (CAGR) of a little over 10%, an average trend growth rate seen in the last decade. Five states — Maharashtra, Tamil Nadu, Karnataka, Uttar Pradesh and Gujarat — that constitute approximately 40% of the country's nominal GDP would play a key role in this national goal's achievement. A conservative 7-7.5% real economic growth can make India an upper-middle-income country by 2047, but the growth rate needs to accelerate to 8-8.5% to make the country a higher-income nation, economic advisory council to the PM (EAC-PM) chairman Bibek Debroy had said.

## Pvt sector's response to commercial mining encouraging: Coal secretary

ENS ECONOMIC BUREAU  
Mumbai, May 15

THE RESPONSE TO the commercial coal mining from private sector players has been very encouraging so far and the sector is likely to contribute about 20-25% to the overall domestic coal production by 2030, Coal Secretary Amrit Lal Meena said.

The government opened up the commercial coal mining for private entities in 2020. So far, six tranches of auctions have been concluded successfully and 87 coal mines have been auctioned. "...this is not a reality. The response from the private sector on commercial coal mining is quite appreciable. So far, we have done a total six rounds

of coal mine auctions in which 87 mines have gone to the private sector for the commercial purposes," Meena said, when asked about media reports that said the demand from the private sector has been tepid. He was speaking to reporters on the first day of 3rd ETWG Meeting under India's G-20 Presidency in Mumbai.
