Sub: Press Release

Dear Sir/Ma'am,

Please find enclosed the Press Release regarding the "Receipt of Major Order for EHV Cables from Gujarat Energy Transmission Company Limited".

We request you to kindly take the same on record.

Thanking you,

Yours sincerely,
For Diamond Power Infrastructure Limited

Diksha Sharma
Company Secretary

Receipt of Major Order for EHV Cables from Gujarat Energy Transmission Company Limited

Ahmedabad, India

Diamond Power Infrastructure Limited (“DPIL” or “the Company”), one of India’s oldest and most trusted manufacturers of power cables and transmission conductors under the brand *DICABS*, is pleased to announce the receipt of a **significant order for supply of 66 kV Extra High Voltage (EHV) Cables** from Gujarat Energy Transmission Company Limited.

This order, aggregating approximately **270 kilometers of 66 kV EHV cables**, marks a **major milestone** for the Company and reinforces DPIL’s strong positioning in the high-voltage cable segment.

Key Highlights of the Order

- **Client:** Gujarat Energy Transmission Company Limited
- **Product:** 66 kV EHV Power Cables
- **Order Size:** ~270 kms
- **Segment:** Transmission Infrastructure
- **Execution Timeline:** 4 months from day of Purchase Order

Strategic Significance

- This is one of the **largest single EHV cable orders** received by the Company and represents a **breakthrough achievement** in the transmission segment.
- The order is expected to **significantly contribute to revenue visibility and profitability** over the execution period.
- It further strengthens DPIL’s presence with **state transmission utilities**, a critical segment in India’s power infrastructure growth

Strong Execution Track Record

DPIL has demonstrated robust capabilities in the EHV cable segment, having:

- **Received and successfully executed over 90 kms of 66 kV and 110 kV EHV cable orders** in the last six months
- Supplied to leading **private sector developers and infrastructure players**
- Built a strong reputation for **quality, reliability, and timely delivery**

EHV Cable Segment - A High Entry Barrier Industry

The Extra High Voltage (EHV) cable industry in India operates as a highly specialized and restricted segment, characterized by:

- Limited number of qualified manufacturers with proven design, manufacturing, and testing capabilities
- Requirement of advanced CCV (Catenary Continuous Vulcanization) lines and precision manufacturing
- Mandatory compliance with stringent type testing and pre-qualification standards
- Long approval cycles by utilities and EPC players

As a result, the EHV cable space is often regarded as a “closed club” of technically qualified and approved manufacturers, where entry barriers are significantly high.

DPIL, with its state-of-the-art manufacturing infrastructure and NABL-approved testing facilities capable of testing up to 700 kV, is well positioned among this select group of manufacturers.

Order Book Position

With this order, the Company’s total outstanding order book as on 30th March 2026 stands at over ₹3,500 Crores, providing strong revenue visibility for the coming periods.

Management Comment

Commenting on this development, Mr. Umesh Chayya, Senior President, Sales & Marketing of Diamond Power Infrastructure Limited stated:

“We are delighted to receive this prestigious order from GETCO. This reinforces our technological strength and execution capability in the EHV cable segment. The scale of this order is a testament to the trust placed in DPIL and marks a significant step forward in our growth journey. With a strong order book and increasing participation in high-voltage transmission projects, we remain confident of delivering sustainable growth and enhanced value for all stakeholders.”

About Diamond Power Infrastructure Limited

Diamond Power Infrastructure Limited is one of India’s leading manufacturers of power cables and conductors with over five decades of legacy. Under its flagship brand *DICABS*, the Company offers a comprehensive range of products from 1.1 kV to 400 kV, catering to utilities, EPC contractors, renewable energy developers, and industrial customers.

The Company’s manufacturing facilities are supported by world-class testing infrastructure, enabling compliance with global standards and ensuring superior product performance.
