Dear Sir/Madam,

Sub: Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – New Product Launch

Pursuant to Regulation 30(6) read with Part A of Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("**Listing Regulations**"), we are pleased to inform that the Company has launched a new product "Pulse.nerve, a first-of-its-kind enterprise orchestration platform designed to unify the fragmented intelligence".

The details as required under Regulation 30 of the Listing Regulations read with SEBI Master Circular HO/49/14/14(7)2025-CFD-POD2/I/3762/2026 dated January 30, 2026, are given below:

S. No.	Particulars	Details
1.	Name of the Product	Pulse.nerve
2.	Date of Launch	March 31, 2026
3.	Category of the Product	Information Technology
4.	Whether caters to domestic/ international market	Both (Domestic and International)
5.	Name of the countries in which the product is launched (in case of international).	Globally

A press release regarding the above launch is enclosed as **Annexure A** for reference, which is self-explanatory.

The above information shall also be hosted on the Company's website: www.digitide.com.

This is for your information and record.

Yours faithfully,
For **Digitide Solutions Limited**

Digitide Solutions Unveils 'Pulse.nerve' to Orchestrate the Agentic Enterprise; Launches 100+ Specialized AI Agents

Bengaluru, March 31, 2026 — Digitide Solutions Limited (NSE: DIGITIDE), a global leader in AI-first digital transformation, today announced the launch of **Pulse.nerve**, a first-of-its-kind enterprise orchestration platform designed to unify the "fragmented intelligence" currently slowing down global organizations.

Built on the **Model Context Protocol (MCP)**—the emerging "USB-C for AI" standard—Pulse.nerve acts as a universal control layer, allowing enterprises to manage, govern, and synchronize AI agents across siloed technology stacks. The launch is supported by the release of **100+ ready-to-deploy AI agents** within the Pulse.ai ecosystem, targeting high-impact functions in BFSI, Healthcare, and Retail.

Solving the "AI Chaos" Crisis

As we enter 2026, the enterprise AI landscape has reached a breaking point. While **Gartner projects that over 40% of enterprise applications will embed role-specific AI agents by the end of this year**, most organizations are struggling with "disconnected intelligence."

Current industry data reveals:

- **The Fragmentation Gap:** 73% of enterprises now run five or more disconnected AI agents, leading to an average of **\$2.1 million in annual waste** due to redundant integrations.
- **The Governance Risk:** Without a central control layer, AI-related incidents take an average of **47 minutes to resolve**, exposing firms to significant compliance and operational risks.
- **The Market Opportunity:** The global Agentic AI market is estimated to reach **\$10.8 billion in 2026**, yet only 14% of enterprises have deployment-ready orchestration systems.

*"Enterprises are no longer struggling with a lack of AI; they are drowning in it," said **Gurmeet Chahal, CEO & Executive Director of Digitide Solutions**. "Pulse.nerve is the central nervous system the industry has been waiting for. By providing a unified execution layer, we are moving organizations from fragmented experimentation to a coherent, governed, and high-ROI agentic strategy."*

Pulse.nerve: The Universal AI Control Layer

Pulse.nerve sits above the enterprise stack, using MCP-native connectors to bridge the gap between enterprise platforms like Salesforce, SAP, Oracle, ServiceNow, Guidewire, and Duck Creek. Key capabilities include:

- **Intelligent Task Routing:** Automatically directs complex workflows to the most efficient agent based on real-time context and enterprise policy.
- **The Enterprise "Kill-Switch":** A centralized governance dashboard that allows for instant rollback or halting of any AI agent across the ecosystem.
- **Universal Compliance:** Enforces global security and audit rules once, applying them automatically across every connected agent.
- **100+ Specialized Agents:** Pre-trained digital personas for engineering, HR, CXM, and collections, designed to deliver "Day 1" productivity.

Measurable Impact: A Case Study in Insurance

In a recent production deployment for a leading global insurer, Pulse.nerve orchestrated agentic workflows across **Guidewire, Salesforce, and Oracle**. The result was a **45% improvement in operational productivity** and a **3.4x acceleration** in AI time-to-value, achieving 100% audit visibility for the first time.

About Digitide Solutions Limited

Digitide is a next-generation technology and business transformation partner that helps enterprises reimagine their future through AI-led innovation, deep domain expertise, and global delivery excellence. We combine strategic vision with executional agility to solve complex business challenges, unlocking new value across industries – banking, financial services, insurance, healthcare, manufacturing, retail and e-commerce. Digitide empowers organizations to accelerate digital transformation, scale with confidence, and thrive in a rapidly evolving world. With a team of 55K professionals serving over 300 clients worldwide, we generate more than USD 350 million in annual revenue. For more information, visit: www.digitide.com
