**Attributable to owners of the company*

Commenting on the results, Mr. Vinod Kumar Gupta and Mr. Binay Kumar Gupta, Managing Directors, Dollar Industries Limited said*:*

"We are pleased to report our results for the second quarter and first half of FY27, with healthy value and volume growth.

Operating Income for the quarter rose by 14.3% YoY to ₹53,928 lacs. For H1 FY27, Operating Income stood at ₹94,409 lacs, registering growth of 8.4% YoY.

For the quarter ended Q2 FY27, Gross Profit grew by 4.5% YoY to ₹17,139 lacs, with a Gross Profit Margin of 31.8%. The moderation in gross margin was primarily attributable to higher cotton prices, a key raw material for the company. Operating EBITDA stood at ₹6,054 lacs, with a margin of 11.2%. While gross margins came under pressure, disciplined cost management, stringent overhead controls and operating leverage helped cushion a part of the impact at the Operating EBITDA level. Profit After Tax attributable to owners stood at ₹3,579 lacs, with a PAT Margin of 6.6%.

For H1 FY27, Operating EBITDA stood at ₹10,831 lacs, with a margin of 11.5%, while PAT stood at ₹6,181 lacs, with a margin of 6.5%. As we move into the second half of the financial year, our focus remains on driving profitable growth through improved operating efficiencies, disciplined cost management and higher volumes.

Our newer growth channels and product categories continued to gain momentum during the quarter. Quick commerce recorded growth of 58.5% in value and 52.4% in volume terms, with its contribution to overall revenue increasing from 4.0% in Q2 FY26 to 5.4% in Q2 FY27. This reflects the growing consumer preference for convenient, on-demand access to everyday essentials and underscores the importance of strengthening our presence across emerging distribution channels.

Dollar Thermal, our winterwear segment, registered a growth of 17.7% in value and 10.2% in volume terms during the quarter, contributing 12.6% to overall revenue. Dollar Protect, our rainwear segment, also witnessed strong traction, recording value growth of 208.1%, supported by a favourable monsoon season. These categories continue to strengthen our product portfolio while enabling us to address evolving consumer needs across adjacent product segments.

Our export business also delivered a strong performance during the quarter, with value growth of 56.8% and volume growth of 45.5%. We view international markets as an important long-term growth opportunity and will continue to focus on expanding our global presence.

We remain confident that our initiatives across core markets, emerging channels and exports will keep driving growth in the coming quarters. With our strong brand portfolio, extensive distribution network and sustained focus on execution, cost discipline and profitability, we are well positioned to capitalise on the opportunities ahead and deliver sustainable value to our stakeholders."
