Dynacons Secures its First International Order worth USD 6.83 Million from the Ministry of Public Works, Public Utilities and Digital Economy, Caribbean Digital Transformation Project Unit, Commonwealth of Dominica

Dynacons Systems & Solutions Limited ("Dynacons"), a leading IT infrastructure and digital solutions company, is pleased to announce that it has secured its first international order, marking an important milestone in the Company's journey towards expanding its presence in global markets.

The prestigious contract, valued at USD 6.83 million, has been awarded by the Ministry of Public Works, Public Utilities and the Digital Economy, Government of the Commonwealth of Dominica, under the Caribbean Digital Transformation Project for the Health Management and Information System (HMIS) IT Infrastructure.

Under the project, Dynacons will undertake the supply, installation, configuration and maintenance of comprehensive IT infrastructure supporting the HMIS ecosystem across 3 hospitals, 49 health centres and 2 wellness centres in Dominica. The engagement is spread over three years and includes ongoing support, warranty, preventive maintenance and corrective maintenance.

The scope encompasses a broad range of critical healthcare IT infrastructure including endpoints for HMIS applications, radiology workstations supporting PACS, computers on wheels, laptops, printers, barcode scanners and printers, SAN switches and storage, Microsoft infrastructure and licences, firewalls and Network Access Control solutions, patient identification wristbands and related equipment.

This order represents a significant milestone for Dynacons as its first international project and marks the Company's entry into the Caribbean market. It demonstrates Dynacons' ability to leverage its proven capabilities in designing, deploying and supporting mission-critical digital infrastructure in India and extend these capabilities to international markets.

The project also builds on Dynacons' experience in supporting healthcare and HMIS-related IT infrastructure in India. The Dominica engagement further strengthens Dynacons' credentials in digital healthcare infrastructure, systems integration and managed services, while opening opportunities for the Company to participate in similar digital transformation initiatives across international markets.

Commenting on this milestone, Mr. Shirish Anjaria, Chairman cum Managing Director of the Company said:

"Securing our first international order is an important milestone in Dynacons' growth journey. The project provides us an opportunity to take the capabilities and experience we have built over several years in India to an international market.

Healthcare technology infrastructure is a mission-critical area, and we are pleased to have been entrusted with supporting the Health Management and Information System infrastructure across hospitals and healthcare centres in Dominica. Our experience in implementing and supporting complex IT environments, provides us with a strong foundation for successful execution of this project.

More importantly, this order marks the beginning of Dynacons' international expansion and we believe it can serve as a reference point for pursuing similar digital transformation opportunities in global markets."
