Ducol Organics Strengthens South Asian Footprint with Bangladesh Expansion

Company looks to tap Bangladesh's construction chemicals market, estimated at approximately one-fourth the size of India's.

Mumbai, November 17, 2026: Ducol Organics & Colours Limited, a rapidly growing chemical manufacturing company with over three decades of industry presence, is expanding its construction chemicals business in Bangladesh as part of its broader international growth strategy. The company will develop its business in collaboration with Dysin International Ltd, with whom it has maintained a business relationship for more than three decades. The initial phase will focus on introducing waterproofing, concrete and building repair solutions into the market, with plans to progressively broaden its product portfolio.

As part of its initial market-entry strategy, Ducol will focus on exporting and marketing these products while developing customer relationships and establishing a distribution network to build a foundation for its business in the country.

Over time, Ducol plans to broaden its portfolio to include building finishing solutions such as tile adhesives and other allied product categories, supported by the expansion of its manufacturing capabilities. Its long-term ambition is to establish itself as a comprehensive Construction Chemicals and Waterproofing (CCWP) solutions provider in Bangladesh, with offerings spanning concrete, waterproofing, building repairs, flooring, roofing, sealing, bonding and building finishes.

Bangladesh presents a meaningful opportunity for Ducol’s expansion plans. According to the company’s assessment, the addressable market across these key CCWP segments in Bangladesh is estimated to be one-fourth the size of the corresponding market in India. Ducol believes its longstanding business relationship in the country, combined with its technical expertise and expanding product capabilities, provides a strong foundation for growth.

Ducol has been progressively expanding its international footprint through strategic partnerships across markets, including the Middle East, Africa and Eastern Europe. Its partnership with Malaysia-based Qualibit Chemicals & Industries has further strengthened its presence in Southeast Asia. The Bangladesh expansion builds on these international relationships and reflects the company's continued focus on exploring opportunities in new markets.

Commenting on the expansion, **Mr. Aamer Farid, Managing Director, Ducol Organics & Colours Limited**, said, “At Ducol, we believe that sustainable growth begins with a clear understanding of the markets we serve and, most importantly, the needs of our customers. Our focus is on developing solutions that address their evolving requirements, deliver meaningful value and build lasting relationships. As we look towards the next phase of our growth, we will continue to strengthen our capabilities, explore new opportunities and remain attentive to what our customers expect from us. Ultimately, our ambition is to create value through products and solutions that earn their trust and satisfaction over the long term.”

The Bangladesh expansion also reflects Ducol's broader strategy of leveraging its established expertise in dispersion technologies to explore adjacent product verticals. The company intends to build on its existing OEM relationships and develop new collaborations to broaden its product portfolio and strengthen its capabilities across construction chemicals.

About Ducol Organics & Colours Limited

Ducol Organics & Colours Limited is a rapidly growing chemical manufacturing company with over three decades of expertise in dispersion chemistry and construction chemicals. The company operates across pigment dispersions, masterbatches, and waterproofing solutions, serving end-use industries such as paints and coatings, plastics, inks, textiles, FMCG, and infrastructure. Ducol has manufacturing facilities in Maharashtra and Gujarat and serves customers across India and select international markets. The company's subsidiaries include Bitumag and XCHEM, focused on waterproofing and construction chemical solutions, and Altek, which supports its international expansion initiatives.
