Datamatics Global Services Wins CIO CHOICE 2016 honours & recognition in BI & DMS Categories

13th January 2016, Mumbai: Datamatics Global Services Ltd (DGSL), a global leader in providing IT and BPO services, won two top honours at the 4thannual edition of CIO CHOICE 2016 in Mumbai. The company received recognition in the category of Document Management and Business Intelligence solutions.

On being recognized in the two coveted categories, Mr. Rahul Kanodia, CEO & Vice Chairman, Datamatics said, "We feel honoured to be recognized by the Indian CIO and IT decision maker community for two of our IPs – iQ and nSights, under Document Management and Business Intelligence categories respectively".

"CIO Choice trust seal is a Gold Standard and validation from the CIO community in the recognized brand as a Trusted Partner. By being voted by CIOs, Datamatics has proven their expertise in Document Management and Business Intelligence solutions, placing them amongst the top percentile of enterprise ICT vendors in India", said Anoop Mathur President at Centre Of Recognition & Excellence.

Added Anoop, "When CIOs look for an IT partner to meet their business challenges, choosing a company that has trust of CIO Choice Logo is an intelligent move. It is a CIO endorsed IT brands with successful deployments at their customer ends."

Rahul further stated, "Being acknowledged by the industry experts in multiple categories for supporting our clients in their 'Data to Intelligence' journey stands as a testament to our focus and growing recognition in this niche. We shall continue our endeavors to innovate and expand our enterprise offerings to help our customers maintain competitive edge by gaining business insights".

Datamatics has been helping its global customers enhance business productivity through smart automation of data driven processes. Datamatics' iQ is an intelligent document processing platform that leverages artificial intelligence, image topography analytics, pattern recognition and business algorithms to intuitively identify and efficiently digitize any form or type of document in fraction of time with little or no manual intervention.
