Trading Symbol: "SOLARINDS EQ"

Scrip Code: 532725

Sub: Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirement) Regulations, 2015.

Dear Sir / Madam,

The Company is pleased to inform the stake holders that "The Defence Minister Mrs. Nirmala Sitharaman has handed over ToT for mass production of a crucial solid propellant booster of Brahmos to Economic Explosives Limited a wholly owned subsidiary of Solar Industries India Limited (Solar Group), during the 'Defence Industry Development' meet organised by Department of Defence Production, Ministry of Defence (MOD) at Chennai on Thursday, 18th January, 2018."

This is the latest step towards self-sufficiency in production of propulsion system for Brahmos missile being imported from Russia. Solar Group is accessing technology transfer from DRDO for Brahmos. Solar Group has already commenced work on missile integration facility which will be completed soon and with this technology transfer we are looking forward to trial production of Brahmos by the end of this year.

The **BrahMos**, a medium-range ramjet supersonic cruise missile that can be launched from submarine, ships, aircraft, or land, is the fastest supersonic cruise missile in the world will now be manufactured in India. Currently, India imports about 35 boosters annually and the demand for the booster is going to be high, as Indian Air-force will induct more missiles on its fighter jets in the near future. Since the booster will be indigenously made, the maintenance will be timely as well as cost effective.

Other Defense Updates

- Solar Group is truly contributing to make the country not only self-sufficient in defense ammunition but reverse the trend and start exporting.
- Our country was dependent on imports for the high explosive materials like HMX and related compounds which are used for munitions. The world class plant set up by Solar Group has made our nation self-sufficient in these products.

- Solar Group has already indigenised production of igniters for Invar Missile as also the war head which were being imported from Russia.
- Solar Group has absorbed technology from DRDO for sophisticated multi-mode hand grenades and successfully completed user trials. Production will commence shortly.
- MOD has released request for proposals for replacing imported ammunition like 30 mm and 122 mm Extended Range Rockets in which Solar Group will participate. This involves production of war heads, propulsion systems, fuze and integration.
- Solar Group is committed to augment the facilities to take part in the RFPS of various other ammunitions.

This is for your information and records.

Thanking You.

Yours Truly

For Solar Industries India Limited
