Subject: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015 – Import of Machinery & Advance 30% Deposit for the same.

Dear Sir / Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby inform that Vimlesh Industries Private Limited, a wholly owned subsidiary of Divine Power Energy Limited, has executed a **technical cooperation and machinery supply arrangement with an overseas equipment manufacturer** (name withheld as per confidentiality obligations) for the **import of specialized production machinery**, auxiliary equipment, and related technical support required for establishing a **Continuously Transposed Conductor (CTC) production line** at our manufacturing facility.

The said procurement qualifies as a material equipment acquisition. The key details of the transaction are as under:

Nature of transaction:

Import and installation of production machinery (CTC Plant), laboratory testing equipment, and online inspection systems.

Total contract value:

USD 1,840,435 (EX-Factory Price).

Scope of services by the overseas supplier:

Supply of machinery, installation and commissioning assistance, operator training, remote technical support for three years, and deployment of technical experts for on-site production support.

Payment terms:

- 30% advance deposit
- 70% payable prior to delivery

Further, both parties are bound by a confidentiality clause restricting disclosure of technical details and commercial collaborators.

This machinery import, along with the embedded technical cooperation, is expected to significantly enhance the **Company's operational efficiency and technological capabilities**. At present, this category of equipment is predominantly imported from China; establishing this production capability locally will substantially **reduce reliance on imports and strengthen supply chain resilience**. The **global demand for transposed conductors** and related advanced conductor technologies **is witnessing strong growth**, accompanied by a heavy shortage of high-precision machinery required for such manufacturing. By securing this equipment, the Company positions itself competitively within a rapidly expanding sector, gains **early-mover advantage in localized production**, and ensures better control over delivery timelines, cost structure, and product customization. Further, **higher capacity utilization, improved quality, and reduction in processing time** are expected to contribute to **enhanced profitability and long-term operational sustainability**.

We further wish to inform that the Company has made the 30% advance payment **on 04th December 2025** towards the import of the above machinery. Accordingly, this intimation is being filed based on commencement of the financial outflow.

This disclosure is being made in the interest of transparency and compliance with statutory requirements.

Kindly take the above on record.

Thanking you.

Divine Power Energy Limited
