EaseMyTrip Becomes India's First Listed Travel Company to Integrate with ChatGPT Apps

EaseMyTrip brings AI-powered travel discovery and booking directly to users, delivering more personalised and interactive experience

New Delhi, 2nd April 2026: EaseMyTrip, one of India's leading online travel-tech platforms, has announced its integration with ChatGPT, making it India's only listed online travel company to go live on the ChatGPT app. With this development, users can now seamlessly search for flights and hotels directly within a conversational AI interface, enabling a more intuitive and efficient travel planning experience.

The integration allows users to discover and access EaseMyTrip through the apps section on ChatGPT, where they can simply input their travel requirements in natural language and receive relevant flight and hotel options instantly. By eliminating the need to navigate across multiple tabs and platforms, the feature significantly reduces friction in the travel discovery process and enhances overall convenience.

The move is aligned with EaseMyTrip's focus on leveraging technology to simplify travel and enhance user experience. By integrating with ChatGPT, the company aims to tap into the next wave of AI-led consumer behavior, where travel planning becomes more intuitive, personalized, and instant.

On this development, Nishant Pitti, Founder & Chairman, EaseMyTrip, said: "AI is fundamentally reshaping how consumers discover and transact. Being the first listed Indian travel company to go live on ChatGPT app marketplace reflects our commitment to staying ahead of the curve and building the future of travel. This is just the beginning of a much deeper AI integration across our ecosystem."

EaseMyTrip continues to invest in new-age technologies as part of its broader strategy to expand beyond traditional travel booking and build a more integrated travel and lifestyle platform. The integration further strengthens EaseMyTrip's positioning as a tech-forward, innovation-led platform focused on simplifying travel for modern consumers.

Looking ahead, EaseMyTrip aims to expand this integration into a more comprehensive travel assistant by incorporating additional services, including holiday packages and other service verticals, thereby creating a unified, AI-powered travel ecosystem.
