Enser Communications Announces Enterprise-Grade AI Noise Cancellation Platform to Revolutionize BPM Communications

Gurugram, July 22, 2026: Enser Communications Limited (“Enser”), a leader in Business Process Management (BPM) solutions, announces the development of its proprietary enterprise-grade noise cancellation software platform. Engineered by Enser's core technical team, the scalable solution eliminates background noise in real-time during large-scale client interactions, setting a new benchmark for voice communication in the BPM sector.

Currently in its final testing phase across Enser’s internal operations, the platform addresses a long-standing industry challenge: maintaining crystal-clear, distraction-free voice environments in high-density call center operations. While initially developed to optimize Enser’s internal workflows, the platform has been designed for broad commercial deployment, enabling third-party enterprises to elevate their customer communication infrastructure.

Commenting on the development, **Mr. Girish Devadiga, AVP – Strategic Partnerships, Enser Communications Limited**, said:

"Our vision extends beyond solving our own operational challenges- we are building a scalable, foundational technology that will transform how enterprises handle voice communication. By delivering total audio clarity, we simplify complex client interactions, minimize miscommunication, and directly enhance agent productivity."

Key Value Propositions for Enterprises:

- **Superior Audio Clarity:** Completely eliminates background noise and ambient distractions during live customer interactions.
- **Cost Efficiency:** Early internal projections indicate partner organizations could achieve an estimated 4–5% savings on agent desk infrastructure investments every two years.
- **Enhanced Productivity:** Aims to improve operational performance by reducing call handle times and improving first-contact resolution rates.

The platform is undergoing final refinements led by a dedicated engineering team, with full commercial availability and partner onboarding details to be announced following completion final launch validation.

About Enser:

Enser is an emerging player of Business Process Management (BPM) Industry, offering cutting-edge solutions designed to enhance customer experience and drive operational excellence.
