Subject: Investor Presentation of Envirotech Systems Limited.

Dear Sir/Madam,

Please find enclosed the Investor Presentation of Envirotech Systems Limited, for the half year ended 30th September 2026.

The Company has scheduled an Earnings call with investors and/or analysts on Monday, November 16, 2026, at 04.00 p.m. IST. The analysts and/or investors may join the call through the link mentioned below. The dial-in details are also provided below for participation in the Earnings Call:

Option 1 – Diamond Pass™ (Recommended)
Participants are encouraged to join through Diamond Pass™ for seamless and faster access to the conference call.
Diamond Pass Registration Link

Kindly take the above information on record.

Yours faithfully,
For **Envirotech Systems Limited**

ENVIROTECH® SYSTEMS LIMITED

About Us

Transform Your Space with Acoustic Excellence

Envirotech Systems Limited is a leading acoustic products manufacturing organization specializing in noise measurement and control for industrial and commercial applications. Incorporated in **2007,** we have expanded our capabilities to include innovative acoustical product design and manufacturing. With over **150 employees** and a network of technical experts, we offer cost-effective solutions for various acoustical challenges in industrial, commercial, architectural, and environmental markets.

Wide Applications Across Diverse Industries

ENVIROTECH® SYSTEMS LIMITED

Products - Acoustic Enclosure

Acoustic Enclosure Solutions for Industrial Noise Control

Envirotech Systems Limited provides high-performance **Acoustic Enclosures** for effective industrial noise reduction, ensuring safer and quieter working environments.

- Gas Turbines
- Steam Turbines
- Air Compressors
- Diesel Generators (DG Sets)
- Industrial Pumps
- Conveyors
- CNC Machines
- Scarfing Machines
- Fin Press Machines
- Heavy Industrial Equipment
- Forging Machines

ENVIROTECH SYSTEMS LIMITED

Products - Noise Test Booth

Noise Booth Solutions

Envirotech Systems Limited provides advanced Noise Booth solutions designed for accurate noise testing and effective shop floor noise isolation. Our booths create controlled acoustic environments for precise product sound testing and quality analysis.

- Automotive sector
- Air conditioner manufacturing units
- Refrigeration units
- Fan, motor & Compressors manufacturing units
- Speaker and sound purity testing etc.

ENVIROTECH SYSTEMS LIMITED

Products - Engine Test Room Acoustic

Engine Test Room Acoustic Solutions

Engine Test Cells provide a controlled acoustic environment for accurate and repeatable product testing and development. Acoustic treatment helps prevent excessive engine noise from spreading to nearby areas, ensuring reliable testing conditions in the automobile industry. Our acousticians and engineers carefully analyze engine acoustic profiles to deliver efficient and high-performance Engine Test Cell solutions.

ENVIROTECH SYSTEMS LIMITED

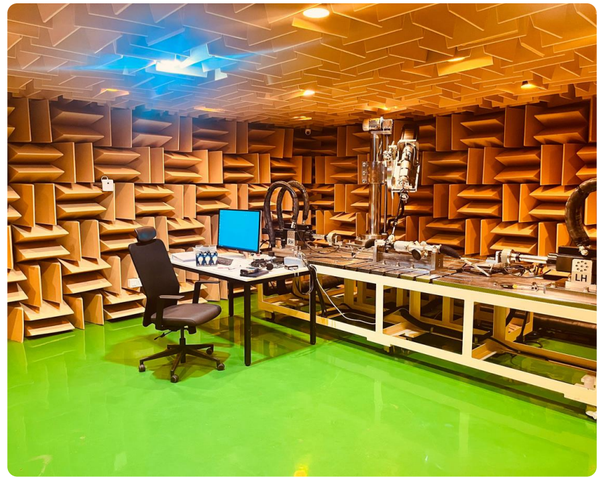

Products - Anechoic Chamber

An anechoic chamber (an-echoic or non-echoing) is a room designed to stop reflections of sound waves. They are also insulated from exterior sources of noise.

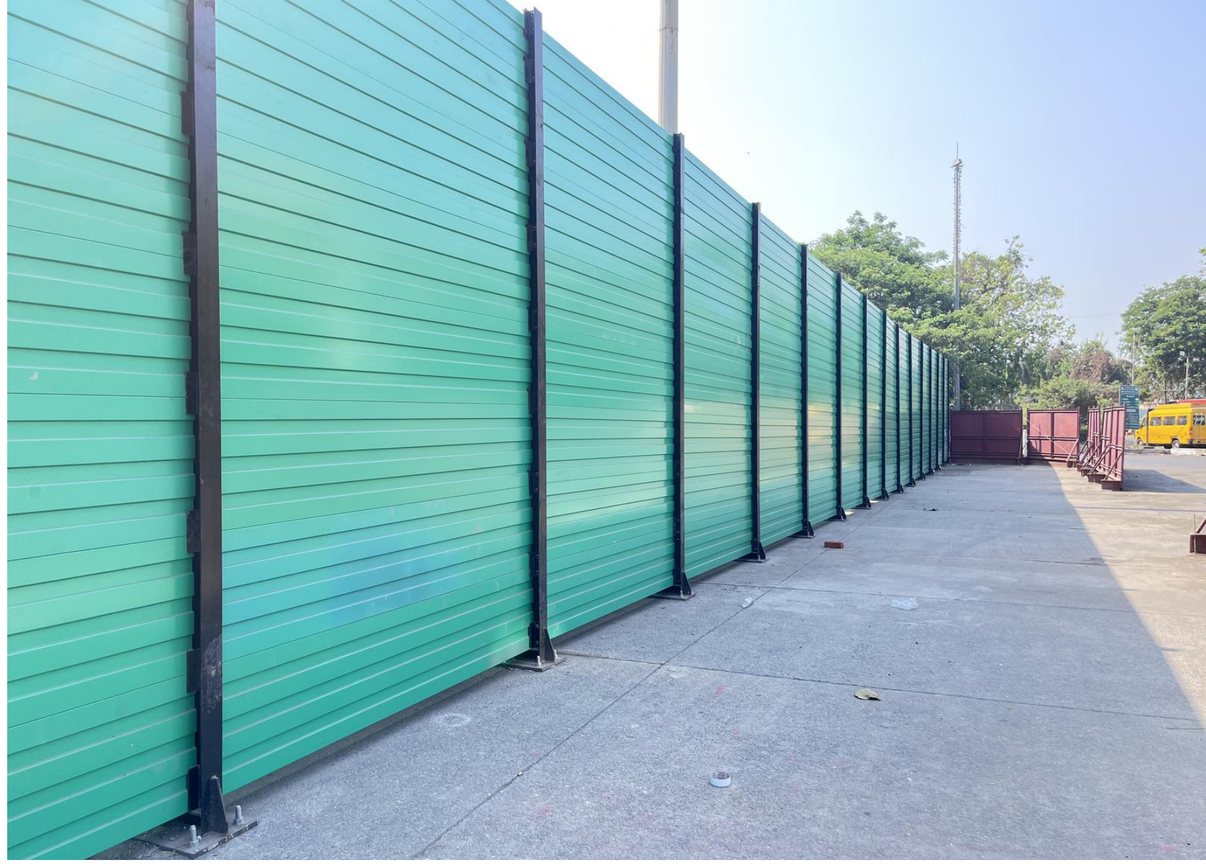

SEMI-ANECHOIC CHAMBER

A room which create free field conditions but above a reflective plane. Above a certain frequency all sound waves that hit the walls or ceiling of the chamber will be absorbed. This type of chamber normally used in vehicle testing with a rolling round so that the vehicle may be driven.

Products - Noise Barriers

Noise Barrier Solutions

We offer a full design, delivery and installation service, which can also include all necessary structural steelwork. Barriers can be erected by our own, trained personnel or installed by other contractors, end users etc.

Areas of Application:

- Mechanical Plants
- Roads, Metro & Railways
- Airport Boundaries
- Construction
- Oil & Gas
- Refurbishments
- Maintenance Activities
- Outdoor & Indoor Events
- Other Areas like hospital, schools, airports, etc.

ENVIROTECH SYSTEMS LIMITED

Products - Acoustic Louvers

Acoustic Louver has a sound baffle designed to allow airflow through ventilation openings while reducing the radiation of noise. Typical application for our acoustic louvers used in conjunction with machine and enclosures, sound barrier walls and sound control rooms to allow silenced airflow. Our Acoustic screens and enclosures solve a wide range of environmental noise pollution problems emanating from mechanical plant and systems including:

Areas of Application:

- Chillers
- Motors
- Compressors
- Pumps
- Roof top plant rooms

ENVIROTECH SYSTEMS LIMITED

Products - Acoustic & Fire Doors

Acoustic & Fire Doors are specially engineered doors that provide both fire protection and sound insulation. They help prevent the spread of fire and smoke while reducing noise transmission, making them ideal for commercial, industrial, healthcare, and institutional buildings.

Our Products Range:

- Metal Acoustic Doors
- Wooden Acoustic Doors
- Metal Fire Door
- Wooden Fire Door
- Glazed Fire Door
- Blast Proof Door
- Fire Rated Sliding Door
- Clean Room Door
- Fire Rolling Shutter
- Acoustic & Fire Windows

ENVIROTECH SYSTEMS LIMITED

Products - Semi Automatic Partitions

A Semi-Automatic Sliding Folding Partition is a movable wall system consisting of interconnected panels that slide along an overhead track and fold into a designated parking position when the space needs to be opened.
The system combines manual panel movement with an automatic sealing mechanism. When the partition reaches the closed position, the drop-down seals engage automatically to improve the acoustic integrity of the partition.

The system combines manual panel movement with an automatic sealing mechanism. When the partition reaches the closed position, the drop-down seals engage automatically to improve the acoustic integrity of the partition.

ENVIROTECH SYSTEMS LIMITED

Turnkey Auditorium Acoustic Solutions

We offer complete **Auditorium Acoustic** systems that deliver exceptional sound performance and noise control. Our solutions are specially engineered to improve speech intelligibility, minimize echo and reverberation, and create a comfortable acoustic environment for educational, commercial, and institutional spaces.

Our Products Range:

- Grooved Wooden slats
- Perforated Wooden Slats
- Micro Perforated Panels
- Acoustic Wall Panel
- Acoustic Hanging Baffles
- Ceiling Acoustic Tiles
- Acoustic Spray
- SoundMicro Wall Panels

Management Commentary

Mr. Manoj Kumar Gupta
Managing Director

1. Strategic Inflection Point:

We are in the midst of a pivotal phase of organizational transformation, anchored by substantial capacity expansion to position the business for its next wave of growth.

2. Near-Term Margin Calibration:

As expected during a major infrastructure build-out, the upfront operational and commissioning costs associated with this expansion are flowing through in the current financial year, affecting our near-term profitability steeply.

3. Measured & Disciplined Execution:

Our capacity ramp-up is progressing in a calibrated, phased manner, tracking firmly in line with our strategic roadmap and operational milestones. We are setting up Automated plant for Fire Rated Doors which once 100% operational has capacity to produce about 36,000 doors annually (Revenue of approx. Rs 72 crores annually). Additionally, we have received approvals for our D-3 plant which should take about one year to complete. Once fully operational this facility shall have capacity to contribute up to Rs 300 crores in Revenues.

Management Commentary

Mr. Manoj Kumar Gupta

Managing Director

4. Medium-Term Growth Trajectory:

With these foundational capabilities coming online, we remain confident in our trajectory to scale revenues to approximately ₹300 crore over the next three to four years, driving sustainable long-term value for our stakeholders.

Disclaimer: This update contains forward-looking statements, including FY2027 and FY2028 expectations. These are based on current assumptions and are subject to risks and uncertainties. Actual results may differ materially.

Company Update: Expansion, Operational Progress & Growth Outlook

❖ **Strategic Expansion & Infrastructure Milestones**

- **Fire-Rated Doors Capacity & Utilization Ramp-Up:**

  Our newly established fire-rated doors manufacturing vertical—with an annual capacity of about 36,000 doors—is scaling steadily. While initial utilization shall stand at 20% (FY2026-27), we project a structured ramp-up across FY 2027-28 and FY 2028-29, with full 100% capacity utilization poised to unlock an incremental revenue potential of approximately ₹72 crore.

- **D-3 Facility Development:**

  We have secured the requisite regulatory approvals for our upcoming D-3 facility, a state-of-the-art 1,00,000 sq. ft. infrastructure (comprising a basement plus four floors). Construction and commissioning are tracking on schedule for completion within 12 months, positioning the facility to begin contributing meaningfully to operations in FY 2028-29 and FY 2029-30.

Company Update: Expansion, Operational Progress & Growth Outlook

ENVIROTECH SYSTEMS LIMITED

❖ Operational Dynamics & Working Capital Discipline

- **Receivables & Large-Project Execution:**

  Current receivables stand at ₹22 crore as in Nov 2026, largely due to ongoing execution of long duration projects. Collections remain healthy and aligned with project milestone billing cycles.

- **Proactive Inventory Positioning:**

  Elevated inventory levels are a deliberate operational measure to support the commissioning of new production lines and hedge against raw material price volatility in the market.

- **Top-Line Resilience:**

  We are in a transitory period of sales consolidation, revenue performance is almost at par with last year levels though on full year basis we strive to achieve around 20% growth in top line for FY2026-27.

- **Margin Calibration During Scale-Up:**

  Near-term pressure on operating margins reflect the upfront fixed and operational costs inherent in ramping up new manufacturing lines. As utilization of new capacity scales toward optimal levels over the coming quarters, operating leverage is expected to drive sustained margin expansion.

Company Update: Expansion, Operational Progress & Growth Outlook

ENVIROTECH SYSTEMS LIMITED

❖ Order Book & Medium-Term Growth Trajectory

- **Strong Order Book Visibility:**

  Our active order book stands at a robust ₹31 crore providing strong revenue visibility and underscoring healthy market demand across our product portfolio.

- **Clear Growth Guidance:**

  Backed by expanding production capacities, timely execution of the D-3 facility, and a growing order pipeline, we have a clear, multi-year growth roadmap for next three to five years, keeping us firmly on course toward our medium-term revenue aspiration of ₹300 crore over the next three to four years.

Disclaimer: This update contains forward-looking statements, including FY2027 and FY2028 expectations. These are based on current assumptions and are subject to risks and uncertainties. Actual results may differ materially.

ENVIROTECH SYSTEMS LIMITED

Growth Drivers

- Introducing Soundproof Windows & Doors
- Collaboration with IIT-Delhi to develop new products
- Collaboration with CKM Taiwan
- Collaboration with CSIR - National Physical Laboratory
- Introducing B2C Vertical
- Targeting Defence Industry
- Enhancing Capacities & Robust Order book

Catering to Defence Industry

ENVIROTECH SYSTEMS LIMITED

- High demand from defence industry
- High margin segment
- This segment is a major contributor to total Revenues
- We expect huge growth from this vertical.

- Providing specialized acoustic solutions like anechoic chambers, soundproof rooms, acoustic enclosures, and RF absorbers to DRDO labs, Hindustan Aeronautics Limited, Bharat Electronics, and Defence Research Institutes across India.

- These projects span key defense and research locations, including Hyderabad, Bangalore, Delhi, and Vishakhapatnam.

Our Clients

Collaboration with IIT- Delhi

Collaboration with IIT-Delhi to Develop Acoustic Solutions Utilizing Waste

Envirotech® Systems Ltd, signed a Memorandum of Understanding (MoU) with the prestigious Indian Institute of Technology, Delhi (IIT-Delhi). This partnership aims to utilize the waste (agricultural, plastic, etc.) to revolutionize the acoustic solutions domain. This initiative not only aims to reduce environmental waste but also promotes sustainable manufacturing practices.

Key Highlights of the Collaboration:

- Innovative Use of Waste Materials: The newly developed solution will ensure durability, efficiency, and environmental sustainability.
- Technology and Research: IIT-Delhi will provide cutting-edge research and technical support, while Envirotech Systems Ltd will focus on manufacturing and market deployment.
- Environmental Impact: Expected to significantly reduce the environmental burden by repurposing the waste into valuable acoustic solutions, contributing to India's sustainability goals.

Collaboration with CKM Taiwan

Envirotech® Systems Ltd, has signed an exclusive collaboration with CKM Taiwan for Perforated Aluminium which has very good sound absorbing properties. This can be used in various industries for noise absorption.

Collaboration with CSIR - National Physical Laboratory

Envirotech® Systems Ltd Partners with CSIR- National Physical Laboratory (CSIR-NPL)- "Design and Development of Photovoltaic Noise Barrier Panel for Noise Control with Electricity Generation Applications.

Envirotech® Systems Ltd, a trusted name in noise control solutions, is proud to announce a Memorandum of Understanding (MoU) with the prestigious CSIR- National Physical Laboratory (CSIR-NPL). This partnership "Design and Development of Photovoltaic Noise Barrier Panel for Noise Control with Electricity Generation Applications to revolutionize the acoustic solutions domain.

As part of this initiative, CSIR–National Physical Laboratory (CSIR-NPL) will provide scientific research support, performance evaluation, and technical validation. Envirotech Systems Limited will be responsible for manufacturing, system integration, commercialization, and large-scale deployment of the technology.

Enhancing Capacities

Unit 1 & 2

Fire rated Doors, Architectural Acoustics & Auditorium Acoustics

Utilisation: ~20-30%

Located in Kasna, Greater Noida

Unit 3

Partial operational capacity
Utilization: 80%-85%

Remaining Capacity to be operational in FY2027-28. Approvals received and work started on site

Located in Kasna, Greater Noida

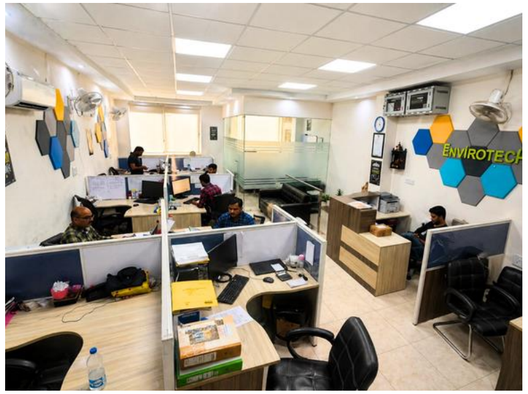

Robust Orderbook

Order book as of 1st Nov 2026 is of Rs. 31+ crores

- The Company is in talks with its regular customers for large size orders

- Some large defence orders are expected soon.
