Escorts Kubota Holds Groundbreaking of New Greenfield Manufacturing Plant in Uttar Pradesh

The 154-acre facility at Sector 10, YEIDA, will be developed in multiple phases as part of Escorts Kubota's long-term growth strategy. Upon completion of all phases, the facility is expected to become one of the largest manufacturing sites within the Kubota Group globally.

New Delhi, 19 August 2026: Escorts Kubota Limited, the farm and construction equipment major, has done the groundbreaking of its new greenfield manufacturing plant at Sector 10, Gautam Buddha Nagar, in the industrial area of the Yamuna Expressway Industrial Development Authority (YEIDA), Uttar Pradesh. The plant will be developed on a land parcel spanning across 154 acres.

The new plant will be developed in phases with total indicative investment outlay of over *INR* 2,000 crore. Upon completion of all phases, it will be one of the largest manufacturing facilities for the Kubota Group across the globe.

The new plant is part of the company's strategic capacity expansion. It will manufacture tractors, farm implements, construction equipment and engines, and will cater to both domestic and global markets. It is also expected to generate significant employment opportunities in the region as it is built out.

Phase 1 shall witness capacity expansion of up to 60,000 tractors and 15,000 construction equipment units per annum, along with supporting infrastructure and allied facilities. The project will be funded from the proceeds of the earlier preferential issue of shares to Kubota Corporation and from internal accruals.

YEIDA allotted the land to the company, following a Letter of Intent with the Government of Uttar Pradesh. The site lies near the Yamuna Expressway, close to the Noida International Airport at Jewar. The location combines road and air connectivity for pan-India distribution and exports with access to the engineering and supplier base of the National Capital Region.

"India is one of the world's largest and fastest growing tractor market, and it plays a significant role in Kubota's growth strategy for the year 2030. This greenfield facility and its scale reflect the role we expect India to play. India is no longer only a market for Kubota. It is becoming a manufacturing and engineering hub for Kubota globally," said **Shingo Hanada, President and Representative Director, CEO, Kubota Corporation.**

“Escorts began in 1944 with a simple conviction, that Indian farmers and builders deserve machinery built with the same rigour as anywhere in the world. This is one of the largest investment we have made in our own manufacturing capacity, and a defining moment in that journey. The plant will serve farmers and construction contractors across India and global markets, while strengthening the country’s position as a manufacturing hub for the world,” said **Nikhil Nanda, Chairman and Managing Director, Escorts Kubota Limited.**

“This is an integrated manufacturing campus. Across its multiple phases, it will considerably increase our capacity from today’s levels. Machining, assembly, testing, engines and a mother warehouse for spare parts will sit on a single site. We are embedding the Kubota Production System, automation and digital quality control from day one, along with energy-efficient utilities and rigorous safety standards,” said **Akira Kato, Deputy Managing Director, Escorts Kubota Limited.**

The project is aligned with Kubota Corporation’s Mid-Term Business Plan 2030, which identifies India as one of the Group’s growth drivers. The plan also sets out the intent to build a global hub for affordable manufacturing in India.

Escorts Kubota has an existing manufacturing capacity of approximately 1,70,000 tractors and 10,000 construction equipment units per annum.

About Escorts Kubota Limited

Escorts Kubota Limited (EKL) is a leading engineering conglomerate with over 80 years of expertise, dedicated to delivering top-tier solutions in agricultural and construction equipment that drive India’s development. The company crafts cutting-edge, dependable products, including its renowned tractor family—Farmtrac, Powertrac and Kubota. It also offers specialised Farmpower agricultural machinery and a strong lineup of construction equipment brands. Together, these solutions unite Indian ingenuity with Japanese precision for exceptional performance. Through an extensive dealer network, EKL ensures these advanced, reliable products reach customers across India and globally, upholding its legacy as a forward-thinking leader in transforming agriculture and infrastructure.
