OPEC+ sticks with plan for steady oil output quota

REUTERS
London, November 1

OPEC+ OIL-PRODUCING countries kept December production targets steady on Sunday, confirming expectations that more policy adjustments will not occur until next year, as the group continues to struggle with export disruptions from the Iran war.

Seven core OPEC+ members — Saudi Arabia, Russia, ?Iraq, Kuwait, Algeria, Kazakhstan and Oman — made the decision in an online meeting on Sunday, OPEC said in a statement. While Gulf members have been boosting exports that have been disrupted for months by the conflict, most are still pumping well below their targets.

OPEC+ comprises the Organization of the Petroleum Exporting Countries and allies including Russia. Only the seven members — plus the United Arab Emirates until it quit OPEC in May — have been involved in monthly output decisions in recent years. All members of the 21-country group are ?due to meet on November 29, when analysts expect it will decide 2027 quotas.

"Today's decision was the easy one," said Jorge Leon, an analyst at Rystad.

"The much more important test comes at the November 29 ministerial meeting, when OPEC+ will decide its 2027 production framework."

Oil prices jumped more than 2% on Friday, with Brent crude settling at almost $118 a barrel, the highest since April, as traders braced for a potential escalation in the Iran war after the US midterm elections.

The International Energy Agency and other forecasters have warned of excess supply in 2027 should Gulf flows return to normal.

"OPEC+ faces an extremely difficult call for 2027," Leon added.

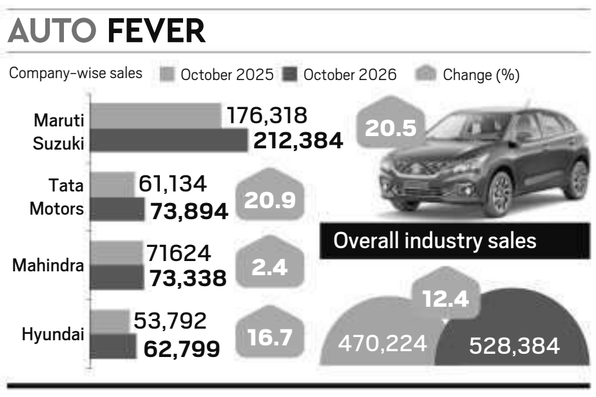

"The group has to plan around huge uncertainty over the US-Iran war, the pace of recovery through the Strait of Hormuz, and the size of the surplus that could emerge once disrupted barrels return."

The seven members have been boosting output targets for much of 2026 and in September completed the phased rollbackof a 1.65 million-barrel-per-day supply cut first agreed in 2023.

At earlier meetings, they kept the targets steady for October and November.

FROM THE FRONT PAGE

Car sales rev up 12.4% in Oct on...

THE DIVERGENCE IN growth highlights how manufacturers are benefiting differently from the demand recovery. Maruti Suzuki and Tata Motors recorded stronger growth across their portfolios, while Mahindra's relatively modest increase reflects a high base in the SUV segment, which accounts for the bulk of its passenger vehicle sales.

Maruti Suzuki reported its highest-ever monthly domestic passenger vehicle sales in October, but the broader demand picture also points to supply constraints. Dealer inventory stood at just 12 days, while pending bookings were around 245,000 vehicles, indicating that the company is still struggling to fully meet demand.

The automaker expects to gain at least two percentage points in market share, building on its approximately 40% share in FY26, as demand for small cars and SUVs supports volumes.

"We expect to gain the market share by at least 2%, but we have to wait and watch till all the numbers come," said Partho Banerjee, senior executive officer, marketing and sales, Maruti Suzuki India.

The company expects to sustain double-digit growth in FY27, although fewer working days in November due to festivals could constrain production and vehicle dispatches.

Mahindra attributed its record monthly SUV sales to strong festive demand and a refreshed product portfolio.

"The festive season, together with a refreshed portfolio, kept demand strong across SUVs, pick-ups and three-wheelers. Our first CNG vehicle, the XUV 3XO ZNG has also seen strong traction with customers," said Velusamy R, president, automotive business, Mahindra & Mahindra.

Hyundai Motor India said festive demand and export momentum contributed to its performance.

"Strong festive demand, coupled with healthy momentum in both domestic and export markets, helped us set this new sales record.

"Going forward, the newly launched Hyundai BAYON — our intelligent utility vehicle — will provide further impetus to our growth," said Tarun Garg, managing director and CEO, Hyundai Motor India.

However, sustaining the October momentum could prove challenging in the coming months.

The year-on-year growth figures will face a higher base of comparison following strong festive-season sales in the corresponding period last year. Demand could also moderate after the festival-led buying cycle, making it harder for automakers to maintain the current pace of growth.

Rising commodity prices are adding to the pressure, with manufacturers indicating the possibility of further vehicle price increases.

Maruti Suzuki, which has already implemented three price hikes this year, said it could consider calibrated increases if input costs remain elevated. Higher vehicle prices could weigh on affordability and make it harder for automakers to sustain sales momentum.

Sluggish sowing & low output...

AVERAGE RETAIL ONION prices rose to ₹53.42/kg on Saturday, up 100% from a year earlier. Retail prices have risen in the last couple of months because of a fall in output, while prices in Delhi-NCR have crossed ₹65/kg.

To curb the price rise, the government has started to offload onions at the subsidized rate of ₹35/kg from its buffer, while sources said that prices are likely to rise for a few more weeks until the arrival of the kharif harvest. "Food inflation is surging and is already at 7.7% (in September). With the El Nino impact becoming visible, it is time to take action. Either release more stocks in the open market or allow more imports of sugar, pulses and oilseeds at low duty," Ashok Gulati, agricultural economist, told FE.

Retail prices of mustard oils increased to ₹208.18/kg on Saturday, an increase of 11% over the previous year.

Sugar prices saw a sharp spike in August because of a decline in production during the 2025-26 season (October–September) and the government announced raw sugar imports of 1 million tonne (MT).

Prices of rice increased to ₹48.38/kg on Saturday, a 12% increase over the previous year, amid prospects of lower non-Basmati variants output especially in the southern regions. Retail inflation in rice in September was 8.25% compared to 5.89% in August 2026.

An official said the government currently holds over 37 MT of rice stock against a buffer requirement of 10.25 MT for October 1; this stock would be offloaded under the open market sale scheme to curb the price rise.

Retail prices of chana (gram) dal, which accounts for 50% of the country's pulse production, as of Sunday witnessed an 8% year-on-year increase despite robust buffers and imports of yellow peas. Wheat prices have increased only by over 2% year-on-year to ₹32.49/kg. FCI currently holds 45.4 MT of wheat stock against a buffer of 20.5 MT for October 1.

Sharma of Crisil said within field crops, paddy, maize, tur, cotton and groundnut warrant closer monitoring, given the expected pressure on yields. "Paddy has faced weather-related stress in key growing regions, while maize, pulses, oilseeds and cotton could see lower output conditions accompanied by relatively firm prices," Sharma said.

Q2 story: Strong

OF THE 105 results that have been analysed from its coverage universe, 56% of companies reported results above expectations.

Makers of consumer goods and retailers have been impacted by the shift in the festive season to October-November this year. The outlook, however, is optimistic with management commentary suggesting the peak festive period will be rewarding in terms of sales. At the same time, there is some concern raw material pressures will not ebb soon. Godrej Consumer Products, for instance, confirmed input cost inflation continues to be higher in Q3; the company could soon take price hikes in some categories. TVS Motor too expects commodity pressures to persist, albeit at a lower intensity than in the April-September period.

At Asian Paints, the management expects volumes to grow at 8-9% in the second half of FY27, better than in Q2. The company also plans to take further price hikes of around 3%, which would help shore up margins; Ebitda (earnings before interest tax, depreciation and amortisation) margins contracted 200 basis points in the September quarter; the approach now is to balance growth and margins.

At Hindustan Unilever, which reported its best revenue growth in 14 quarters, gross margins contracted sharply by 400 basis points as the company's price hikes have been gradual in an inflationary environment.

However, the FMCG player's Ebitda margins dipped by a much smaller 130 bps y-o-y as HUL reined in expenses on A&P and extracted cost efficiencies.

While net sales for a sample of 773 companies (excluding BFSI, Vedanta and Oil marketing companies) were up a smart 25.08% y-o-y, operating margins were virtually flat at 16.67% as total expenses rose 24.81%. Net profits for the sample were up a strong 28.66%. Reliance Industries posted a good set of numbers as consolidated net profit was up 40.6% y-o-y in the quarter, led by a strong performance from its oil-to-chemicals (O2C) business.

Retailers have reported decent results. Avenue Supermarts' revenue growth accelerated to 18% y-o-y in Q2, compared with 15% in Q1 as like-for-like growth recovered to 9.5% y-o-y from 5.5% in Q1FY27. Again, Trent's revenue from operations rose 22% y-o-y, pushing up the operating profit by 37%.

Analysts at the Jefferies have noted that banks, two-wheelers, power utilities and consumer goods companies have delivered good results with IT services and consumer staples turning in mixed numbers.

A 44% y-o-y jump in revenues, boosted by a 27% rise in volumes, helped TVS Motor gain operating leverage and overcome commodity cost headwinds. The 2-wheeler manufacturer's margins were also supported favourable currency benefits and tight cost-control measures.

On the other hand, the performance of four-wheelers has been weak.

At Maruti Suzuki, revenues grew 26% y-o-y but they were helped by a low base and were driven entirely by volumes. Realisations at the country's biggest carmaker were flat y-o-y. Ebitda margins contracted by 310 points leaving the operating profit lower by 6%. Hyundai Motors' realisations were up by about 3.3% y-o-y while volumes were up 15% supporting sales growth of 18.5% y-o-y. Gross margins declined by 270bp y-o-y weighed down by elevated commodity prices.

PM to meet Niti top brass amid global headwinds

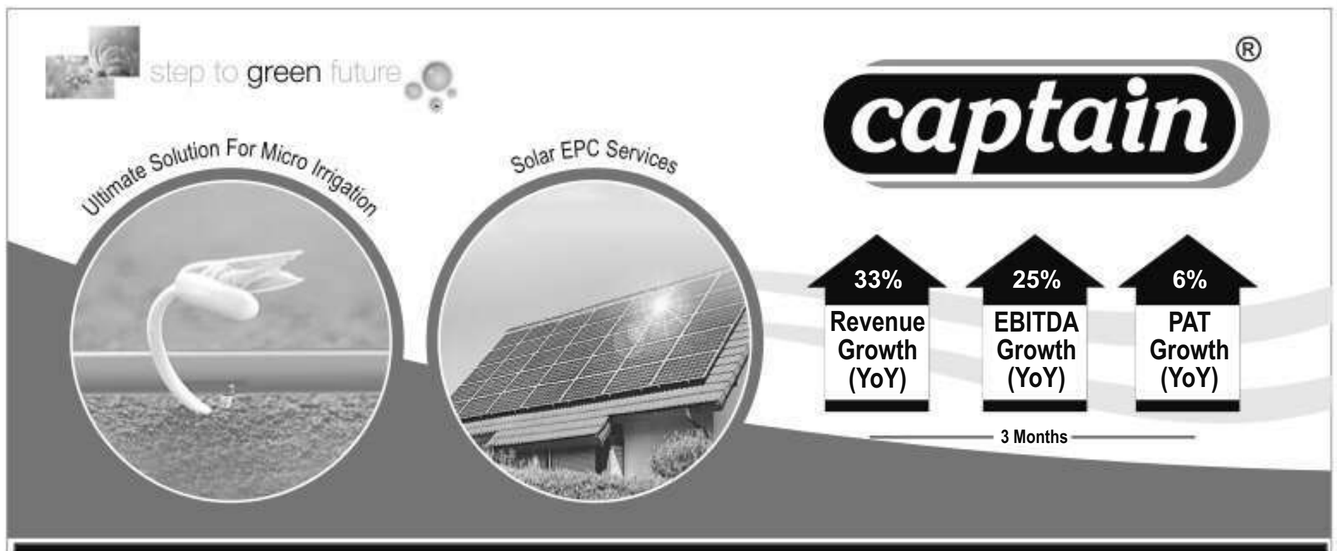

THE DISCUSSIONS ARE also expected to cover ways to scale up manufacturing and accelerate deregulation, as well as policies focused on the poor and farmers. These challenges are likely to persist into 2027.

The seven members of Niti Aayog are former cabinet secretary Rajiv Gauba, economist K V Raju, former AIIMS director M Srinivas, scientist Gobardhan Das, former science and technology secretary Abhay Karandikar, former Capacity Building Commission member R Balasubramaniam, and academician Joram Aniya.

Niti Aayog has emerged as a vital pillar in India's policy-making architecture, fostering cooperative federalism, furthering reforms and boosting 'ease of living'. It serves as a dynamic platform for innovation and long-term strategic thinking across sectors at a time the Centre is pursuing systemic reforms to achieve its vision of Viksit Bharat 2047 and attract global investment. The rupee hit a record low of 96.96 against the US dollar in May 2026 amid surging oil prices and heavy capital outflows triggered by the West Asia conflict. It strengthened 1% in October to 94.95 per dollar, marking its strongest monthly gain since February, aided by RBI intervention. Among other issues, the strengthening of India's human capital through reforms in education, skilling and future-ready employment, while advancing the broader vision of Atmanirbhar Bharat, is also likely to be discussed.

The interaction could also cover how investments in knowledge, health, skills and institutional capacity can support long-term economic growth.
