Fabtech's Step Down Subsidiary 'FTS CLEANROOMS SYSTEMS LLC' completes 14,000 sqm turnkey facility for Himalaya Wellness Company in UAE in less than a year

Mumbai | 11 September, 2026:

Fabtech Technologies Limited (FTL), through its Step Down Subsidiary FTS Cleanrooms Systems LLC, UAE, has delivered a project for Himalaya Wellness Company, a global herbal health and personal care brand in Dubai Internet City to support pharmaceutical and cosmetic manufacturing operations with different cleanroom requirements. The company is based in UAE and offers start-to-finish engineering solutions to the healthcare sector in the MENA region.

The facility has been developed to support both pharmaceutical and cosmetic manufacturing operations and was delivered in less than one year. Retaining the same project team throughout the project was intended to provide continuity between the design, installation and validation stages and reduce coordination requirements between multiple contractors. The approach enabled the project to be completed within the planned timeframe of less than a year.

An integrated approach to the build allowed the design, installation and validation to be managed under a single delivery structure.

The facility forms part of Himalaya's manufacturing operations in Dubai, providing cleanroom infrastructure for the production of pharmaceutical and cosmetic products.

"For a facility of this size, we were impressed with how smoothly FTS Cleanrooms Systems LLC, UAE managed everything," said a project manager at Himalaya. "Coordinating such a large project is never easy, but their team stayed organized and responsive and delivered on schedule. The execution met our expectations, and the overall experience was professional and hassle-free."

The completed project adds to Dubai's manufacturing infrastructure for industries requiring controlled production environments and specialized cleanroom facilities.

Mr. Aman Anavkar, Chief Growth Officer, Fabtech Technologies Limited, said:

"The successful completion of this 14,000 sq. metre facility in under a year is a strong validation of our engineering capabilities, project execution discipline and the strength of our teams across the region. FTS Cleanrooms' successful delivery of the Himalaya Wellness facility further demonstrates Fabtech's ability to provide integrated, end-to-end engineering solutions for sophisticated pharmaceutical, biotechnology and healthcare manufacturing facilities. Delivering complex, mission-critical infrastructure for a globally

recognised healthcare brand reinforces our confidence in our ability to execute increasingly large and sophisticated projects across international markets. Our focus remains on building deeper capabilities across cleanroom infrastructure, pharmaceutical engineering and turnkey project execution, while expanding our presence across high-growth international healthcare and life-sciences markets."

The project represents another important milestone in Fabtech's international expansion strategy, particularly across the **Middle East and other global pharmaceutical and healthcare markets**.

About Fabtech Technologies Ltd,

Fabtech Technologies Limited is a pharmaceutical engineering company providing specialised engineering, technology and turnkey solutions (including Design & Build) to the pharmaceutical, biotechnology and healthcare sectors. Over the past 25 years, Fabtech has developed capabilities across project design, technology transfer, pharmaceutical equipment manufacturing, turnkey project management, cleanroom infrastructure, cleanroom partitions and HVAC, containment solutions, pharmaceutical MEP, clean utilities, process piping, purified water systems and water-for-injection systems.

The company has executed **750+ projects across 62 countries**, supported by a global workforce of 650+ professionals and regional operations across markets including the UAE, Saudi Arabia, Egypt, Nigeria, the UK, Algeria and Sri Lanka. With more than two decades of experience in pharmaceutical engineering, Fabtech has built capabilities spanning turnkey project management, cleanroom infrastructure, pharmaceutical MEP, process engineering, clean utilities, containment solutions and specialised pharmaceutical equipment. The company has executed projects across multiple geographies and continues to strengthen its international engineering and execution footprint.

As pharmaceutical manufacturing capacity expands across emerging markets, Fabtech Technologies remains focused on leveraging its engineering expertise, international presence and execution capabilities to participate in the next phase of global healthcare infrastructure development.
