Fabtech Technologies Ltd

Q2 & H1 FY27 Press Release

28th October 2026

Fabtech Technologies Ltd. (Bloomberg Code: FABTECH:IN | NSE Code: FABTECH | BSE Code: 544558) has announced its financial results for Q2 & H1 FY27 today i.e. 28th October 2026.

Financial Highlights (Consolidated):

₹ In Million	Q2FY27	Q1FY27	Q2FY26	H1FY27	H1FY26
Revenue from Operations	920.9	749.8	1,214.8	1,670.7	1,894.9
EBITDA	155.7	74.1	332.5	229.8	279.8
EBITDA Margin (%)	16.0%	9.5%	26.8%	13.1%	14.5%
Reported Profit After Tax	150.2	42.1	281.1	192.4	219.8
PAT Margin (%)	16.3%	5.6%	23.1%	11.5%	11.6%
EPS in Rs.	3.38	0.95	8.68	4.33	6.79

Performance Summary:

- **The business enters H2 FY27 with its strongest execution runway of the year. The bulk of planned execution falls in this half, and revenue and profitability are expected to step up accordingly as project milestones are delivered.**
- Maximum of our orders / projects are covered with LCs, leaving little room for receivable risk and project execution.
- UAE operations demonstrated strong order traction in Q2 FY27 despite regional challenges, with installation continuing under enhanced security and protective measures.
- Africa initiatives are gaining momentum, including solutions for cell and gene therapy (CGT) and other advanced-technology facility projects.
- Fabtech navigated geopolitical uncertainty and freight volatility across GCC markets while maintaining continuity of operations, deliveries and customer commitments despite higher costs.

What affected our margins?

- Higher freight and logistics costs due to shipping rate escalation mitigated by route re-routing, air uplift and war-risk surcharges. However, this impacted project execution costs and gross profit margins during H1 FY27.
- Exceptional and non-recurring costs arising from enhanced site security, protective measures, standby and idle time, and extended project preliminaries impacted H1 FY27 profitability - not expected to recur at the same level in H2.
- Higher raw material costs on a major reference vaccine project.

Robust Order Book Visibility

- Healthy Order Book of ~**900 Cr.**
- Additional prospective orders from Africa and Saudi Arabia under discussion: Rs. 800-850 Cr.
- The existing order position provides meaningful visibility over the next 12 months.

Growth Outlook

- Confident of achieving its FY27 operational PAT margin objective of 8–9%.
- Deferred orders have been delayed in timing, with no cancellations recorded and customer engagement remaining active.

About Fabtech Technologies Ltd,

Fabtech Technologies Limited is a pharmaceutical engineering company providing specialised engineering, technology and turnkey solutions (including Design & Build) to the pharmaceutical, biotechnology and healthcare sectors. Over the past 25 years, Fabtech has developed capabilities across project design, technology transfer, pharmaceutical equipment manufacturing, turnkey project management, cleanroom infrastructure, cleanroom partitions and HVAC, containment solutions, pharmaceutical MEP, clean utilities, process piping, purified water systems and water-for injection systems.

The company has executed **750+ projects across 62 countries**, supported by a global workforce of 650+ professionals and regional operations across markets including the UAE, Saudi Arabia, Egypt, Nigeria, the UK, Algeria and Sri Lanka. With more than two decades of experience in pharmaceutical engineering, Fabtech has built capabilities spanning turnkey project management, cleanroom infrastructure, pharmaceutical MEP, process engineering, clean utilities, containment solutions and specialised pharmaceutical equipment. The company has executed projects across multiple geographies and continues to strengthen its international engineering and execution footprint.

As pharmaceutical manufacturing capacity expands across emerging markets, Fabtech Technologies remains focused on leveraging its engineering expertise, international presence and execution capabilities to participate in the next phase of global healthcare infrastructure development.
