## Press Release

### **Fractal's Climate Action Progress Recognized: 2025 [CDP] "B" Rating Highlights Governance and Measurable Action**

**NEW YORK / MUMBAI, March 24, 2026** – Fractal ([www.fractal.ai](http://www.fractal.ai)), a publicly listed global enterprise AI company serving Fortune 500® organizations, has secured a CDP "B" rating for the third consecutive year, underscoring robust climate action governance and emissions management in 2025.

CDP, recognized globally as a leading environmental emissions reporting platform, assessed more than 24,800 companies worldwide in 2024, underscoring the scale and scope of its benchmarking process. By measuring and disclosing greenhouse gas emissions, companies contribute to the comprehensive datasets on corporate climate action, enabling investors, policymakers, and other stakeholders to evaluate progress, risks, and opportunities. CDP scores also help organizations identify strengths and gaps in environmental management, guiding sustainability strategies.

Fractal's disclosure through CDP demonstrates rigour in environmental emissions reporting and strengthens accountability to stakeholders, while reinforcing the importance of measuring and monitoring emissions as a foundation for meaningful climate action. The company has been practicing carbon accounting for the last six fiscals and maintaining a greenhouse gas inventory in accordance with the GHG Protocol Corporate Standard and has obtained third-party assurance for its Scope 1, 2, and 3 emissions in line with the AA1000AS standard - moderate level assurance, said **Chetana Kumar, Chief Sustainability Officer at Fractal**.

A CDP rating of "B" reflects a coordinated management of climate-related impact, risks, and opportunities, along with providing demonstrated evidence of actions associated with good environmental management.

As part of Fractal's journey to Net Zero, Fractal continues to prioritize strengthening of processes by acquiring independently assessed third-party credentials. Our offices in Mumbai and Bengaluru are "Leadership in Energy and Environmental Design" (LEED) Gold certified workspaces, conserving resources and managing waste responsibly.

Fractal's Mumbai office is WELL platinum certified, which is a certification demonstrating dedication to the health and well-being of office occupants and visitors. These commitments continue to underscore Fractal's dedication to responsible climate action, in alignment with United Nations Sustainable Development Goal 13 on climate action. Integration of environmental sustainability into Fractal's business strategy and lowering carbon footprint make for resilient operations and support clients in meeting their own climate action and responsible-AI goals.
