Press Release

Awareness session for 300 TPD Municipal Solid Waste (MSW) based Compressed Biogas (CBG) Plant in Bengaluru organised

Bengaluru, November 11, 2026: An awareness session on GAIL's 300 TPD Municipal Solid Waste (MSW) based Compressed Bio-Gas (CBG) plant proposed to be set up at Karnataka Compost Development Corporation (KCDC) premises was organised here today for various stakeholders.

The event was graced by Shri Tejaswi Surya, Hon'ble Member of Parliament, Bengaluru South and Shri Satish Reddy., Hon'ble Member of Legislative Assembly, Karnataka. Shri S. Mowar, Executive Director (Southern Region), GAIL, senior officials of GAIL, representatives of Resident Welfare Association, NGOs and media were present.

The CBG plant is proposed to be set up with an investment of Rs. 123.42 crore and spread across approximately 18 acres and will process 300 tonnes of segregated organic municipal waste daily to produce approximately 12.6 tonnes of CBG and 21.6 tonnes of Fermented Organic Manure (FOM) every day. The CBG (Compressed Bio-Gas) produced from the facility will be supplied to GAIL Gas, a wholly owned subsidiary of GAIL, contributing to the availability of indigenous clean fuel in the state.

The proposed plant is expected to deliver substantial socio-economic and environmental benefits in the state of Karnataka. It will provide a sustainable solution for processing urban organic waste, reduce dependence on landfill disposal, promote cleaner cities and strengthen the state's waste-management infrastructure. With modern odour-control and effluent-treatment systems, the proposed facility will ensure environmentally responsible waste processing while addressing concerns associated with unmanaged organic waste. Further, the plant will convert municipal waste into commercially valuable clean energy and organic manure while contributing to the vision of circular economy.

This initiative reinforces GAIL's commitment to support Karnataka's sustainable development priorities while contributing to the national objectives of Swachh Bharat Mission, Atmanirbhar Bharat and India's clean energy transition. The project is also envisaged as a replicable model for developing municipal waste-to-CBG infrastructure in other urban centres across the country.
