{ SAMPLE REGISTRATION SYSTEM }

Size of rural families shrinks: Report

Abhishek Jha
letters@hindustantimes.com

NEW DELHI: Smaller rural families and an increase in working-age population – these are some of the findings from the latest report of Sample Registration System (SRS; for 2019) which was released on March 13.

According to the report, families in India’s villages are increasingly having fewer children, a trend that will bring down the size of rural households to around the same as their urban counterparts (which are smaller) in days to come. The Total Fertility Level (TFR) – defined as the number of children a woman is expected to have in her reproductive age (15-49 years) – in rural and urban India in 2019 has been estimated to be 2.3 and 1.7.

Rural TFR is now closest to urban TFR since 2006, the earliest year for which this number is reported in the statistical SRS reports published online. In the 2006 SRS report, rural and urban TFR was 3.1 and 2. In the 2018 SRS, these numbers were 2.4 and 1.7.

The convergence in rural and urban fertility rates has an important bearing on the size of rural and urban households.

According to the latest Periodic Labour Force Survey (PLFS) report, the average size of rural and urban households was 4.2 and 3.8 respectively in 2019-20.

The SRS report also supports some of the findings of the National Family and Health Survey which were released in November last year. To be sure, the similarity is directional rather than absolute.

SRS, which is conducted by the Office of Registrar General which comes under the Ministry of Home Affairs is the only official source of demographic data except decadal censuses in India. The census is also conducted by it. The latest SRS round has a sample size of 8.2 million and was conducted across all states of India.

Two sets of numbers from the latest round of NFHS conducted in 2019-2021 received a lot of attention: the TFR and sex ratio. NFHS reported a TFR of 2.0, which is lower than the replacement fertility level of 2.1. Replacement fertility level is the TFR at which a population can replace itself. A value of TFR lower than the replacement level implies that the population is going to decrease. SRS 2019 has reported a TFR equal to the replacement rate. A state-wise

THE SRS REPORT IS THE ONLY OFFICIAL SOURCE OF DEMOGRAPHIC DATA EXCEPT DECADAL CENSUSES IN INDIA

comparison shows that the difference between NFHS and SRS number is a result of a difference in the estimates of some of the most populous states. NFHS estimates of TFR in Uttar Pradesh and Bihar, for example, at 0.83 and 0.97 times that reported by the SRS. The biggest proportional under-estimation by NFHS is in Madhya Pradesh and Chhattisgarh. NFHS has under-estimated TFR in a total of 10 of 22 big states for which SRS estimates are also available. To be sure, NFHS has also over-estimated TFR in nine of these 22 states, some of them with large populations – including Maharashtra and West Bengal.

The sex ratios reported by NFHS and SRS are not comparable. SRS only estimates sex ratio at birth (SRB) and based on data for the past three years while the NFHS fact sheets (the report and unit-level data is yet

to be released) report both overall sex ratio and sex ratio at birth, but the latter is reported for the past five years. The sex ratio at birth in NFHS was 929 female children per 1000 male children. The number is just 904 in the SRS. To be sure, even SRS data shows an improvement in sex ratio at birth. It was 900 in 2015.

The SRS report also shows that India is already experiencing an increase in the share of what is roughly described as working age-population and that this is a trend which is likely to continue. The report shows that India became older in 2019, but because of an increase in the working age population rather than senior citizens.

The share of those in the 0-15 age group decreased from 25.9% to 25.4% and that of the 15-59 age group increased to 66.5% from 66%. The share of the 60 years and above population remained unchanged at 8.1%. This is a trend that has been consistent from the 2012 SRS statistical reports. The share of the 0-15 age group has been decreasing and that of the 15-60 age group increasing, while the share of senior citizens has been relatively stable. In the census

conducted from 1991 to 2011, the share of both working age population and senior citizens increased while that of children decreased.

To be sure, the latest SRS findings also underline the consistent improvement in India’s maternal and child mortality indicators. Maternal mortality ratio (MMR), or maternal deaths per 100,000 live births, has decreased from 113 in 2016-18 to 103 in 2017-19. This is a proportionally faster reduction than recorded between 2015-17 (MMR of 122) and 2016-18. However, it is still a long distance from the Sustainable Development Goal of 70, which has been achieved mostly by southern states.

“With this persistent decline, India is on the verge of achieving National Health Policy (NHP) target of 100/lakh live births by 2020 and certainly on track to achieve the SDG target of 70/lakh live births by 2030,” the health ministry said in statement on the SRS report.

Like MMR, the under-five mortality rate, decreased from 36 per 1000 in 2018 to 35 in 2019. To be sure, this is a much slower rate of decrease compared to the rate of decrease seen earlier.

Narayan Pradhan selected for GD Birla Award for Scientific Research

HT Correspondent
letters@hindustantimes.com

NEW DELHI: Professor Narayan Pradhan has been selected for the 31st GD Birla Award for Scientific Research for his outstanding contribution in the field of material sciences, the KK Birla foundation said in an official statement on Monday.

Instituted in 1991, the award recognises eminent Indian scientists below the age of 50 for their original and outstanding contributions to any branch of science. It carries a cash prize of ₹5 lakh. The recipient is chosen by a selection board, whose present head is professor Chandrima Shah, the president of the Indian National Science Academy (INSA).

Pradhan, a member of the faculty at the School of Material Sciences, Indian Association for the

Narayan Pradhan

Cultivation of Science, Jadavpur, graduated from Odisha’s Fakir Mohan College and did his master’s in chemistry from the Ravenshaw University, Cuttack. He went on to get a PhD from the Indian Institute of Technology (IIT), Kharagpur, in 2001. He did his post-doctoral research at Israel’s Ben Gurion University and the University of Arkansas in the US. In 2007, he joined the Indian Association for the Cultivation of Science as an assistant professor. Pradhan’s research work focused on understanding the chemistry and physics of light-emitting semiconductor nanocrystals. His research group has significantly contributed to the surface construction of the newly emerged light-emitting halide perovskite nanocrystals, which are expected to be the next-generation lighting materials for photovoltaics and making LEDs. He has provided his expertise in crystal modulations to design new shapes of these tiny lighting materials.

A fellow at the Indian Academy of Sciences, Bengaluru, Pradhan has been a recipient of the LNJ Bhilwara Nanoscience award, the DST Swarnajayanti Fellowship award, the DST Nanoscience Young Career award, and the Oxford Nanoscientist award.

5 Indian students die in accident in Canada

Anirudh Bhattacharyya
letters@hindustantimes.com

TORONTO: Five Indian students were killed and two others injured in a road accident in Canada’s Ontario province, police said. The incident occurred on Saturday, when a passenger van, in which the students were travelling, collided with a tractor-trailer, police said.

The students were identified as Harpreet Singh (24), Jaspinder Singh (21), Karanpal Singh, Mohit Chouhan (23), and Pawan Kumar (23).

According to Indian officials, Pawan hailed from Haryana while the other four were from Punjab. The injured students, both from Punjab, are currently undergoing treatment in Kings-ton town of Ontario and are out of danger.

The officials further said that the victims were studying in Montreal and were residents of Brampton in the Greater Toronto Area (GTA). They may have been returning to their residence when the accident occurred, they added.

“On Saturday, March 12, 2022, at approximately 3:45 am, officers from the Quinte West

THE STUDENTS WERE TRAVELLING ON HIGHWAY 401 WHEN THEIR VAN COLLIDED WITH A TRACTOR-TRAILER

Detachment of the Ontario Provincial Police (OPP) responded to a motor vehicle collision on Highway 401 westbound, between Aikens Road and St Hilaire Road,” a statement from the police said.

It added, “The investigation into this collision is continuing at this time, and updates will be provided as they become available. No charges have been laid.”

On Monday, India’s High Commissioner to Ottawa Ajay Bisaria said, “This is a huge tragedy where five young lives have been snuffed out. Our consular team in Toronto is in touch with friends and family of the students to give all possible help and assistance in this tragic time.”

The consular team will facilitate the transfer of mortal remains to India and also help perform last rites of the victims, he added.

{ KERALA SCHEME }

SC questions pension for staff of ministers

Utkarsh Anand
letters@hindustantimes.com

NEW DELHI: The Kerala government’s policy of granting lifelong pension to the personal staff of a minister even if they have served for just two years is mystifying, the Supreme Court said on Monday. A bench of justices SA Nazeer and Krishna Murari flagged its concerns about Kerala being the only state that has such a pension scheme.

“At least 20 persons are appointed for ministers for only two years and then they get pension for full life... Please, tell us why?” the bench asked senior advocate V Giri, who was appearing for the Kerala State

Road Transport Corporation. The transport corporation challenged the higher fuel prices by state-owned oil companies, complaining it would affect the cost of public transport. The bench declined to entertain the petition even as it referred to the state government’s pension policy for staff of ministers.

“If the state is so rich that it can appoint people for just two years and then go on to pay them pension, the state can pay for the fuel too,” the judges told Giri.

At least 980 former personal staff of ministers are getting pension and other benefits from the government. Around ₹8 crore is drawn from the state exchequer towards this.

Pak-based terror groups linked to drugs seized at Mundra: NIA

Neeraj Chauhan
letters@hindustantimes.com

NEW DELHI: The National Investigation Agency (NIA) on Monday filed a charge sheet against 16 persons in the ₹21,000 crore Mundra drug haul case, saying the huge quantity of Afghan heroin seized was being smuggled to India at the behest of Pakistan-based terror outfits so that the money generated through it could be used for anti-India activities.

Eleven Afghan nationals, one Iranian citizen and four Indians including Chennai couple Machavaram Sudhakar and Govindaraju Durga Purna Vais-hali have been named as accused in the case under terror and ille-

Mundra port in Gujarat.

gal drug smuggling charges. At least six accused, including key Afghan players Najibullah Khan Khalid and Muhammad Hussain Dad, Iranian national Javad Najafi are absconding.

As first reported by HT on January 6, Najibullah was running operations in India but he fled days after the 2988. 21-kg heroin consignment was inter-

cepted by the Directorate of Revenue and Intelligence (DRI) on September 13, 2021. The consignment was imported to India through a company run by the Chennai couple -- M/s Aashi Trading Company -- and was exported by M/s Hasan Hussain Ltd, Kandahar, Afghanistan through the Bandar Abbas Port of Iran. Muhammad Hussain Dad runs Hasan Hussain Ltd.

The drugs were found concealed in an import consignment of ‘Semi-processed Talc stones’ originating from Afghanistan.

A statement issued by the NIA on Monday said: “During investigation, it was established that the smuggling of narcotics into India was carried out earlier as well by the same set of persons.”

Banks Board Bureau
An Autonomous Body of Government of India

extends the last date of submission of application for the position of

MANAGING DIRECTOR
of
National Bank for Financing Infrastructure and Development (NABFID)

With reference to Bureau’s earlier advertisement dated February 2, 2022 inviting application for the position of Managing Director in NABFID, it is informed that there has been extension of the last date of submission of the applications, relaxation in the eligibility criteria and updation of compensation package, which are as follows:

Eligibility criteria and given Relaxation:

(A) The candidate should be in the age group of 50 to 60 years as on January 31, 2022 with education qualification of **Graduate** or equivalent or professional qualification of CA/ MBA or equivalent and

(B) should have a minimum experience of 25 years in mainstream banking or financial lending business such as SCBs, AIFIs, and NBFCs of which at least **two years** of current or prior experience should be at the Board Level position or MD/CEO level as of 31st January 2022, including part or whole of this experience in an institution with a balance sheet of more than Rs.3 lakh crore, as of 31.03.2021. The incumbency of Board level position or MD/CEO position should not be older than three years prior to 31st January 2022.

Compensation: Total compensation (total of fixed pay and performance bonus) **not** exceeding Rs. 3.36 crore per annum.

Last date of application: 5:00 pm on 25-Mar-2022

For details of the other eligibility terms and conditions, please see the advertisement on <https://banksboardbureau.org.in/> under the “Vacancies and Recommendations” tab or on <https://www.sidbi.in/en>

How to apply: Interested candidates can apply **online** through the link available on <https://banksboardbureau.org.in/> under the “Vacancies and Recommendations” tab or directly at <https://www.research.net/r/MDNABFID>

The candidates who had applied for the position vide our advertisement issued earlier in February 2022, need not apply again, as their application is already with the Bureau and the Bureau will process their applications based on new relaxed criteria.

Note: All further announcements/details including corrigendum, if any, about this process will be published/provided on our official website <http://banksboardbureau.org.in>.

IN LOVING REMEMBRANCE
