Press release

Navi Mumbai, November 14, 2026

Galaxy Surfactants and LG Electronics sign MoU to co-develop next-generation sustainable cleaning solutions

Meaningful progress is often achieved when organizations come together with a shared purpose and a commitment to solving real-world challenges. Our engagement with LG Electronics reflects this spirit and our ambition to help shape the future of sustainable cleaning solutions.

Leadership Commentary

Commenting on the partnership, **Mr. Vaijanath Kulkarni, Executive Director & Chief Operating Officer, Galaxy Surfactants**, said:

"I am delighted to share that we have signed a Memorandum of Understanding with LG Electronics to co-develop and commercialize next-generation sustainable cleaning solutions.

This partnership brings together two organizations united by a common belief: that innovation and sustainability must advance hand in hand. We are excited to collaborate with LG Electronics, a globally respected leader renowned for its technology excellence, innovation culture, and commitment to shaping a more sustainable future.

I would like to extend my sincere appreciation to the LG Advanced Materials leadership team, and particularly to Mr. Kim, whose conviction in this partnership and personal commitment throughout our discussions have been invaluable. The scale of technological innovation and research excellence across the LG ecosystem is truly inspiring and reinforces the possibilities that emerge from sustained investment in science and technology.

For Galaxy, it marks the beginning of a long-term journey where our collective expertise can contribute meaningfully to the evolution of sustainable cleaning solutions globally.

We look forward to building a relationship founded on trust and a commitment to delivering lasting impact."
