GALLANTT ISPAT LTD.

Company Secretary

The Chairman stated the Board that Company Management is continued in approaching/ discussing with the internal technical team of the Company and Mecon Limited (Appointed consultants) for designing the framework of expansion in capacity of various plants.

Further, the Chairman informed the Board that in the last discussion held with the technical team (referred to as the **"Team"** hereinafter) for implementation of the decision taken in the last Board Meeting dated April 05, 2016., Team pointed out that coke oven plant should also be installed looking to the increasing price of cooking coal. Team further pointed out that fitting the plant of MBF route in the available land of existing unit, will make it difficult to run both the plants smoothly. Team suggested the Management that it is more beneficial and cost effective to go with Direct Reduction of Iron Route (DRI Route) in existing unit and found the available land and other infrastructure feasible for increasing the capacity of existing DRI / sponge route to the tune of 330000 MTPA. Accordingly, a layout plan and investment detail has also been submitted. Team further suggested to install a separate unit of steel making through MBF route with a capacity of 300000 MTPA.

The Chairman further stated that in case Board approve the suggestion of the technical team the total capacity of the company will increase to 630000 MTPA (330000 MTPA through DRI route in the existing unit and 300000 MTPA through MBF route in the proposed new unit) as against the earlier proposal of 450000 MTPA in the existing unit.

In terms of the sales and profitability targets for the coming years, Meeting was of the view that Company should not reduce the proposed capacity expansion as decided in the earlier Board Meeting held on April 05, 2016 but due to technical constrains at present location and infrastructure, Board decide to split the expansion programme in two locations and phases.

Finally, the Board decided that at the existing locations and established infrastructure expansion plan shall be through DRI Route which is as under:

Capacity in MTPA

Units	Unit	Existing Capacity	Proposed Addition in Capacity	Total Capacity After Addition
Captive Power	MW	18	35	53
DRI	MT	99000	198000	297000
Steel Melt Shop	MT	167400	162600	330000
Rolling Mill	MT	162380	167620	330000
