**Management Comments:**

In a statement, **Mr. Vayu Garware, CMD, Garware Technical Fibres Ltd.** said,

“Our financial performance has come on track in Q3FY26 after a challenging Q2, driven by a one-time event which led to a significant decline in North European Salmon Aquaculture orders. Order flow is now normalized and we are working to ship and bill as much as possible in the rest of FY26.

In this quarter, we saw good results in Chile, international value added ropes business and significant growth in domestic business. However, USA duties has impact on our profitability margins for Q3 and some impact will be seen in Q4 as well. We have worked closely to retain all our US customers. With recent announcements for relaxation in USA tariffs, going forward we expect to return back to original margins and ordering cycles in the coming quarters.

The Geosynthetics business continues excellent growth momentum on profitability as well as ROCE.

New product launched in Norway in H1 are receiving a very positive response from the market through good order flows from our largest customers. We are rolling out these products in other markets as well.

With better visibility in the Salmon Aquaculture business and resolution of USA Tariff issues, we are confident that we should be able to come back on healthy profit growth in the coming year.”
