GEI INDUSTRIAL SYSTEMS LTD

GEI Industrial Systems enters into technical tie-up with Swiss Company Innospin

GEI Industrial Systems today, inked a technical alliance with Innospin of Switzerland, in a strategic initiative that will enable the company to tap the huge opportunity offered by Mega Thermal Power Projects. With the tie-up, GEI is set to be the only Indian company that will be equipped to locally manufacture and supply air-cooled steam condensers to new and upcoming super critical thermal power stations. The products will be manufactured at its manufacturing facility in Bhopal.

The tie-up with Innospin will not only facilitate the manufacture of eco-friendly condensers for a high-end segment, but also supply of locally manufactured cost-effective products. GEI is in the process of augmenting its capacity to manufacture air-cooled condensers to 5000 MW and equivalent in 2013 from the current 3000 MW, at a cost of Rs. 105 crore. Switzerland-headquartered Innospin, global specialist in power generation equipments, is one of the leading providers of comprehensive engineering and consulting services. Innospin has a successful record of large power projects executed in China, Middle East and Europe.
