## **Genesys Launches Utility Vertical 'Telescope'; Onboards HFCL for Fiber Planning and Management**

Mumbai, April 29, 2025: Genesys International Corporation Limited, India's leading organization in advanced geospatial and 3D mapping technologies, today announced the launch of its new utility vertical – **Telescope** – an end-to-end fiber planning and management platform. Leveraging its comprehensive All-India 3D map stack with immersive Right of Way (RoW) data across almost 1,500 towns and cities, Telescope aims to revolutionize utility infrastructure deployment and maintenance.

Leading digital network solutions provider, **HFCL Limited**, will be the major client to onboard **Genesys' Telescope platform**, utilizing its advanced capabilities for fiber planning, operations, and maintenance needs across India.

Speaking on the launch, **Mr. Sajid Malik, Chairman and Managing Director, Genesys International Corporation Limited, said**, *"The future of utility planning lies in intelligent geospatial solutions, and Telescope is a significant step towards this future. With our extensive 3D map stack covering India's critical urban infrastructure, Telescope empowers fiber deployment and management with unprecedented accuracy and efficiency. We are delighted to have HFCL, one of India's recognized fiber optic and network solution companies, as our inaugural partner on this journey."*

**Telescope** integrates real-world immersive data with AI-powered tools to simplify fiber route design, streamline operations, and optimize maintenance activities, significantly reducing time, cost, and disruptions. Its Right of Way mapping across India's cities provides stakeholders with ready access to rich, actionable insights necessary for efficient utility management.

### **About Genesys International Corporation:**

Genesys International Corporation Ltd is an advanced mapping company. With the nationwide Genesys constellation of sensors, the Company is building the new India map stack. Genesys International encompasses an understanding of emerging consumer applications related to mapping technology and the capability to provide innovative solutions on the enterprise and government markets.
