“Investors Release”

Gensol Engineering Limited Successfully Commissions Ground-Mounted Solar Power Plant in Panchet, Jharkhand

New Delhi/Ahmedabad, April 9 2025: Gensol Engineering Limited (BSE: 542851, NSE: GENSOL), a leading player in India’s renewable energy sector, today announced the successful commissioning of its ground-mounted solar power plant in Panchet town of Dhanbad district in Jharkhand. This project is developed under a ₹40 crore EPC contract and underscores Gensol’s expertise in executing complex solar installations in challenging terrains. The scope includes comprehensive operations and maintenance (O&M) support for five years.

This 40-acre solar power plant will generate over 15 million units of clean energy annually for commercial applications. The site’s complex topography—featuring loose soil, hard rock formations, and mining excavations—required innovative engineering solutions. Gensol deployed advanced Mounting Structure Systems (MMS) and high-efficiency PV modules, optimizing performance despite the steep terrain. The project is projected to offset 21,000 metric tonnes of CO₂ emissions every year, significantly contributing to Jharkhand’s renewable energy targets.

The plant will bolster Jharkhand’s energy security, reducing dependence on fossil fuels while meeting rising electricity demand. Gensol remains committed to supporting India’s net-zero ambitions through scalable, efficient, and environmentally responsible solar projects.

About Gensol Engineering Limited:

Established in 2012, Gensol Engineering Limited is a leading renewable energy company specializing in solar power EPC services and electric mobility solutions. With a track record of over 770 MW solar projects and an advanced EV manufacturing facility in Pune, Gensol continues to drive innovation and contribute to India’s energy transition.
