Propsoch secures \$2 m in seed funding round

Bengaluru: Bengaluru-based proptech start-up Propsoch has secured \$2 million in a seed funding round. The round was led by Athena Venture Partners, alongside participation from Sparrow Capital and the Vakli Group. The funding will be used to strengthen its core research and advisory capabilities, expand its internal teams, and support its strategic expansion into new regional markets. **OUNBIBAU**

Karnataka Bank enables digital EPF payments

Mangaluru: Karnataka Bank announced its successful integration with the Employees' Provident Fund Organisation (EPFO) on June 1. A media statement said that customers can now make EPF payments on EPFO portal in a secure, efficient, user-friendly manner, ensuring faster processing, real-time validation and instant confirmation. **OU**

Bajaj tops May e3W market as EV sales surge 96% y-o-y

POWER MODE. The firm sold 11,639 electric 3-wheelers during the month: Vahan data

Amit Vijay Mohile
Mumbai

Bajaj Auto emerged as India's largest electric three-wheeler player in May 2026 as EV retail sales surged 96 per cent year-on-year (y-o-y) even though the broader three-wheeler industry remained flat sequentially, according to Vahan data.

Electric vehicles accounted for 46.6 per cent of total three-wheeler retail sales during the month, while ICE volumes continued to decline.

India's three-wheeler market is increasingly being reshaped by electrification rather than fresh demand growth, with Bajaj Auto overtaking Mahindra Last Mile Mobility to emerge as the country's largest electric three-wheeler player in May 2026. Vahan data showed Bajaj sold 11,639 electric three-wheelers during the month, marginally ahead of Mahindra Last Mile Mobility's 10,709 units.

The broader three-wheeler industry, however,

E3W FRONTRUNNER. In contrast, internal combustion engine (ICE) three-wheeler sales declined 4.5 per cent y-o-y and 11.8 per cent m-o-m to 39,650 units **NEUTERS**

showed signs of stalling, with total retail sales standing at 74,221 units in May 2026, almost unchanged from 74,211 units in April.

Within that flat market, electric three-wheeler sales surged 96.3 per cent y-o-y and 18.1 per cent sequentially to 34,571 units, while ICE sales fell 4.5 per cent y-o-y and 11.8 per cent month-on-month (m-o-m) to 39,650 units, according to Vahan data.

In contrast, ICE three-wheeler sales declined 4.5 per cent y-o-y and 11.8 per cent m-o-m to 39,650 units, signalling that EVs are now beginning to cannibalise

conventional fuel-powered volumes in absolute terms rather than merely contributing incremental growth.

EVADEPTION Industry executives said improving operating economics and rising fuel costs are accelerating EV adoption across commercial mobility applications, particularly in three-wheelers, where vehicles operate at high daily utilisation.

"The rising demand for EVs across two-wheelers, three-wheelers, and four-wheelers is a clear indicator that clean mobility is becoming mainstream in India,"

said Uday Narang, Founder and Chairman of Omega Seiki Mobility (OSM).

Omega Seiki Mobility retailed 1,264 electric three-wheelers in May 2026, up 16.4 per cent from 1,086 units in April and 58.8 per cent higher than 796 units sold in May 2025, according to Vahan data.

TVS Motor also sharply expanded its electric presence, with EV sales more than doubling year-on-year to 3,590 units. Electric vehicles now account for over 60 per cent of the company's three-wheeler retail volumes.

Plaggio, one of the more ICE-heavy players in the segment, continued to face pressure with ICE retail sales falling to 6,495 units in May from 7,260 units in April, while EV volumes remained relatively small at 1,251 units.

The latest numbers indicate India's three-wheeler market is approaching a key inflection point where EVs could soon rival ICE vehicles in overall monthly retail sales.

Tata Motors to use Chery-made platform for Avinya premium EVs

Amit Vijay Mohile
Mumbai

The move comes as Tata Motors faces rising competition from other auto-makers **NEUTERS**

Tata Motors will use the Freeland platform produced by Chery Jaguar Land Rover (CJLR) for its upcoming Avinya premium electric vehicles (EVs), marking a strategic shift in its EV roadmap as competition intensifies in India's fast-growing electric passenger vehicle market.

Reuters reported that Tata Motors had turned to a Chery-linked platform after earlier plans tied to Jaguar Land Rover's electrified modular architecture (EMA) were shelved.

Confirming the development, Tata Motors said the first Avinya vehicle, scheduled for launch in India in 2027, will leverage the Freeland platform produced by CJLR and will be manufactured at the company's recently opened Tata Motors Passenger Vehicles-JLR facility at Panapakkam in Tamil Nadu.

The move comes as Tata Motors seeks to accelerate its premium EV programme amid rising competition from Mahindra & Mahindra, JSW MG Motor and other auto-makers.

localisation and supply-chain self-reliance.

"Avinya is being developed as a global premium brand for a next-generation EV portfolio to be built on multiple, scalable platforms and architectures while being anchored in Tata Motors' design, engineering and integration capabilities," the company said.

The auto-maker added that its collaboration with JLR and its partners would form "an important pillar" of its premium EV strategy, while allowing it to leverage the broader Tata Motors Passenger Vehicles Group ecosystem. While Tata Motors confirmed use of the Freeland platform and production at the Tamil Nadu facility, the company did not comment on whether or not initial vehicles will arrive as kits for assembly in India, or specify localisation targets for the programme.

"Avinya's design and development will harness the global strength of the Tata Motors PV Group ecosystem, with production in India reinforcing our commitment to building competitive domestic capabilities alongside globally benchmarked vehicles," the company said.

CHINA LINK SCRUTINY

The clarification comes at a time when Indian auto-makers are facing increasing scrutiny over reliance on China-linked EV ecosystems for platforms, electronics and battery technologies, even as New Delhi pushes

Suzlon to infuse ₹2,500 cr by FY31 to scale up

Avinash Nair
Mumbai

Girish Tanti, Executive Vice Chairman, Suzlon Group

Suzlon Group on Wednesday unveiled its five-year 'Suzlon 2.0' roadmap, outlining plans to invest ₹2,500 crore by FY31 to expand annual renewable energy equipment sales four-fold to 10 GW, establish a 4 GW battery energy storage system (BESS) manufacturing facility in India, and build a 3 GW export business.

The company expects its order book to nearly triple from the current 5.5 GW to 15 GW by FY31, while scaling up its operations and maintenance portfolio from about 15 GW of assets under management (AUM) to 70 GW. Suzlon is also targeting a 40 per cent share of the domestic wind market from the current 33 per cent over the next five years.

"Today, we are primarily a wind energy player. As we grow, we will be able to supply wind, solar and storage and we will also add a layer of energy management systems, which will be the intelligent layer both from a hardware and software point of view," Girish Tanti, Executive Vice Chairman, Suzlon Group, said during an interaction held in Mumbai.

Annual sales are expected

to rise from about 2.5 GW currently to 10 GW by FY31, with wind continuing to account for around 70 per cent of the portfolio. Additionally, the company is targeting 3 GW of export orders and plans to strengthen its presence in markets abroad, where it is already present.

RE UMBRELLA

At the heart of Suzlon 2.0 is the company's transition from a pure-play wind turbine manufacturer to a broader renewable energy platform spanning project development, equipment manufacturing, energy management systems, storage integration and asset management. "Today, we are laying the foundation for moving from a pure-wind play to a renewables play and from a pure equipment supplier to a whole value-chain play across the renewable value

chain," Tanti said.

The company plans to expand into firm and dispatchable renewable energy (FDRE) projects, which combine wind, solar and storage to provide reliable clean power. Suzlon believes its existing wind project pipeline gives it a natural advantage in building such projects. "Good news is that most of the wind sites have the potential to be converted into FDRE. Solar sites cannot get converted, but almost all wind sites can be converted to FDRE," Tanti said.

Battery storage, however, will see direct investments from the company. "As far as BESS is concerned, we will start with an assembly system. It will be about ₹200 crore of investment initially," Tanti said, adding that the facility could eventually scale up to 4 GW.

Synology eyes doubling India business in 5 years

Rohan Das
Taipei

Andrew Huang, Regional Sales Manager, Synology

Synology, a Taiwanese provider of network-attached storage (NAS) devices and on-premise data management services, is looking to double its India business in the next 3-5 years driven by an increased focus on enterprise storage solutions.

Synology's NAS boxes allow enterprises, small businesses and individual consumers to store data locally offering an alternative to cloud-based storage services.

Speaking to *businessline* on the sidelines of Computex 2026 Taipei, Andrew Huang, Regional Sales Manager, Synology, said the company had posted a 40 per cent compound annual revenue growth in India for the last five years.

while the remainder comes from consumers and power users.

ENTERPRISE BIZ

Huang said Synology expects enterprise contribution to rise to around 50 per cent within three years. "In the short term, our priority is to expand our system integrator (SI) ecosystem for enterprise business with at least one strong SI partner in every State."

Government institutions, BFSI, manufacturing, healthcare and media & entertainment are among the company's largest enterprise verticals.

"SMB customers often have budget constraints and a standard NAS server will fulfil about 80 per cent of their needs. But for enterprises, the solutions have to be tailored. A media and entertainment company will

require speed, but for a financial services company it could be security," Huang said.

He added that new government-mandated data regulations and an increased intent for data sovereignty and ownership, especially with the advent of AI, had increased the opportunity for on-device storage services.

Globally, Synology offers cybersecurity solutions where it builds hardware, software and storage solutions for CCTV cameras.

In India, Synology currently only offers surveillance data storage services given the regulations around CCTV products. He added that the company is exploring creating local manufacturing in India for CCTVs within the next three years.

The writer is in Taipei at the invitation of Synology

'Next phase of banking resilience is more about managing uncertainty'

Our Bureau
Mumbai

for known risks, but also to make them adaptable to risks whose timing, form and transmission may be difficult to predict," Swaminathan said in his speech at the School of International and Public Affairs, Columbia University.

The Deputy Governor noted that retail credit, digital lending and microfinance have expanded access, but they also require careful underwriting, fair recovery practices and close monitoring of borrower leverage.

Technology can make banking faster, but it does not make it wiser.

AI, cyber risk, third-party dependencies, climate-re-

Swaminathan J, Deputy Governor, RBI

lated risks and financial interconnectedness will therefore require ongoing attention from banks and supervisors. "Banking resilience is not a fixed achievement. It is a continuing

institutional project. It is built through discipline across the balance sheet and beyond, transparent recognition of stress, balance sheet strengthening, calibrated and adaptive regulation, and responsible conduct within banks," Swaminathan said.

He observed that strong banks require capital and technology, but they also require judgment, governance, accountability and institutions that learn.

"Resilience is not only about withstanding the last shock, but about building the capacity to respond well to the next one," he said.

He underscored that there

are five dimensions of resilience by design: transparent recognition of stress, balance sheet strengthening, stronger supervision, calibrated and adaptive regulation, and resilience within banks themselves.

RISK APPETITE

Swaminathan highlighted that risk has a habit of building quietly in good times and introducing itself loudly when conditions change.

Buffers, governance and risk discipline must be strengthened when growth is strong, asset quality appears comfortable, and risk appetite naturally rises, he added.

Margins of auto parts sector to moderate by 10.5-11% amid W. Asia crisis: Crisil

Our Bureau
Chennai

adequate to fund capital expenditure (capex) and working capital needs.

An analysis of Crisil-rated auto component makers, which accounted for almost half the sector's revenue of ₹9 lakh crore last fiscal, indicates as much.

Last fiscal, OEMs generated over two-thirds of the sector's revenue, while exports and the after-market contributed 16 per cent and 12 per cent respectively.

COST STRESS

Raw materials constitute three-fourths of the sector's total cost. Notably, prices of steel and aluminium, which together account for 50-60 per cent of input costs, have risen sharply.

Anuj Sethi, Senior Director, Crisil Ratings, "Raw materials, employee ex-

penses and power together account for 90 per cent of overall cost structure. Input and energy prices have risen, with minimum wage revisions across several States, adding further pressure. OEMs, accounting for over two-thirds of revenues, offer a cost pass-through, though with a lag of one to two quarters and not always in full, thus moderating operating margins by 100-150 bps to 10.5-11 per cent this fiscal. With revenue growth expected at 9-11 per cent, the impact on overall profitability is expected to remain contained."

Poonam Upadhyay, Director, Crisil Ratings, said, "Capex of auto component players rated by us is expected at ₹27,000 crore this fiscal, up 10 per cent on-year."

NOTICE OF THE 6TH ANNUAL GENERAL MEETING, REMOTE E-VOTING INFORMATION
In continuation to our previous advertisement published on May 23, 2026, NOTICE is hereby given that the 6th Annual General Meeting (AGM) of the Company will be held on Saturday, June 27, 2026 at 10.00 A.M. (IST) through Video Conferencing (V/C) or Other Audio Visual Means (OAVM).
In accordance with the circulars issued by the Ministry of Corporate Affairs (MCA) read with SEBI (Listing Obligations and Disclosure Requirements), 2015 ("Listing Regulations 2015"), Companies are permitted to conduct AGMs through V/C / OAVM without the physical presence of members at a common venue. Therefore, our Company has opted to hold the AGM through V/C to discuss and transact the business outlined in the Notice of AGM dated April 30, 2026.
In compliance with the circulars, Company has sent the notice of the 6th AGM alongwith weblink and QR code to access the Annual Report of the Company for the financial year 2025-26 on Wednesday, June 03, 2026, through electronic mode, to all the members whose email addresses are registered with the Company/RTA / Depository Participants. Further, in accordance with Regulation 36(1)(b) of the SEBI Listing Regulation 2015, a letter providing weblink including the exact path and QR code for accessing the Notice of the 6th AGM and Annual Report 2025-26, has been sent to those shareholders whose email IDs are not registered with the Company / RTA / DP.
These documents are also accessible on Company's website (www.ghcltextiles.co.in), as well as on the websites of BSE Limited (www.bseindia.com), National Stock Exchange of India Limited (www.nseindia.com), and CDSL e-voting platform (www.evotingindia.com). You can also download as per following links/QR code.

As per the cut-off date, which is June 20, 2026 (Saturday), the voting rights of the members will be determined based on their shares in the paid-up equity share capital of the Company. To facilitate the voting process, Central Depository Services Limited (CDSL) will provide the option for members to cast their votes through an electronic voting system, known as 'remote e-voting.' The Notice of the AGM includes information on the process and procedure for remote e-voting, as well as instructions for participating in the AGM through video conferencing.
The remote e-voting period commences on Tuesday, June 23, 2026 at 9:00 a.m. (IST) and ends on Friday, June 26, 2026, at 5:00 p.m. (IST). During this period, members of the Company may cast their vote electronically on the business set forth in the Notice. The e-voting module shall be disabled for voting thereafter. Once the vote on a resolution is cast by the member, the member shall not be allowed to change it subsequently. The voting rights of members shall be in proportion to their shares in the paid-up equity share capital of the Company as on the cut-off date, i.e. Saturday, June 20, 2026.
Additionally, members attending the meeting will have the option to vote through the electronic voting system during the AGM. However, the members, who have already cast their votes through remote e-voting will be able to attend the meeting but will not be eligible to vote again. Detailed instructions for members regarding remote e-voting were provided in the AGM Notice and the newspaper advertisement published in this regard on May 23, 2026.
If you have any queries or issues regarding e-voting, we have provided resources to assist you. You can refer to the Frequently Asked Questions (FAQs) and e-voting manual available at www.evotingindia.com under the help section. Additionally, you can reach out for support by sending an email to helpdesk.evoting@cdslindia.com or by calling 1800-21-09911.
For any grievances related to electronic voting, you can contact to Mr. Prashant Krirkar, M/JFG Intime India Pvt. Ltd. (Formerly Intime India Private Limited), C101, 247 Park, L.B.S. Marg, Vikhroli (West), Mumbai-400083; Telephone number: +91-8108116767 and Email: rt.helpdesk@intime.com.
We kindly request that send your queries at least seven days in advance of the meeting to ensure that the information can be made available and addressed during the meeting.
Your engagement and participation are highly valued, and we are here to provide assistance and support throughout the e-voting process.
