Sub: GKSL scales up Renal Care: 100 units AI-Powered Haemodialysis Machines to be inducted across network. First 8 machines to go live at Gujarat Multi Speciality Hospital, Godhra, Gujarat, within 10 days following completion of all required inspections

Dear Sir/Madam,

The Company hereby announces that it has entered into an arrangement for the procurement of 100 units AI-enabled Haemodialysis machines and the phase-1 deployment of 8 machines at its Gujarat Multi Specialty Hospital, Godhra facility within the next 10 days. All technical inspections have been completed successfully.

Why AI-Enabled Haemodialysis Matters

Unlike conventional dialysis equipment, AI-based haemodialysis machines continuously analyse intra-session data — fluid balance, blood pressure trends, ultrafiltration response and other clinical parameters — to support safer, more personalised treatment for each patient. Key benefits include:

- Real-time decision support for nephrologists and dialysis technicians during each session.
- Early detection of intradialytic complications such as hypotension and cramping.
- Personalised treatment parameters adapted to each patient’s clinical profile.
- Improved consistency, traceability and audit-readiness of every dialysis session.

F-034

Phase 1 Deployment: Gujarat Multi Speciality Hospital, Godhra, Gujarat

- 8 AI-based haemodialysis machines to be installed and commissioned within 10 days.
- All required inspections and clearances completed prior to deployment.
- Trained clinical and technical teams in place to operate the new platform from day one.
- Expanded session capacity will enable GKSL to serve more patients from Godhra and adjoining districts without travel to tertiary centres.

Network-Wide Rollout

The remaining machines from the 100-unit procurement will be progressively deployed across GKSL's network of dialysis centres in a phased manner, in line with site readiness and clinical demand. The investment is intended to substantially scale up access to high-quality, technology-enabled renal care across Gujarat.

The said expansion is in line with the Company's strategic objective of scaling up dialysis capacity and strengthening technology-enabled patient care across its network of healthcare facilities in Gujarat.

Thanking you,

Yours faithfully,

For Gujarat Kidney and Super Speciality Limited

Dr Pragnesh Bharpoda

Managing Director
