GMDC Promotes Green Energy Towards a Sustainable Future Introduces Electric Vehicles at its Corporate Office

Ahmedabad, December 14, 2022: Gujarat Mineral Development Corporation (GMDC), a leading mining PSU, has today announced that they are promoting a green and sustainable future. Towards this, the company has introduced Electric Vehicles at its corporate office in Ahmedabad to promote green energy and sustainable development.

A total of 14 Electric Vehicles have been introduced replacing conventional vehicles. The company has always believed in green energy and environmental responsibility as a mining company. This initiative is the company's contribution towards a clean environment as the electric vehicle is having zero-emission, and will not pollute the air. GMDC can help reduce the environmental impact of charging cars further by choosing renewable energy options.

As a part of future projects, GMDC is taking steps to venture into the mining, processing and refining Rare Earth Elements. This will reduce India's dependence on imported Rare Earth Elements while providing fuel for Clean Energy, building an economically stronger and environmentally greener nation.

Mr. Roopwant Singh, IAS, Managing Director, GMDC, said, "E-mobility is imperative for addressing pollution in the country. Working towards a zero-emission environment by introducing these EVs, we at GMDC are hoping to create awareness about Green Energy which is beneficial for Sustainable development".

About Gujarat Mineral Development Corporation Limited (<https://www.gmdcltd.com/en>; BSE: 532181; NSE: GMDCLTD)

Gujarat Mineral Development Corporation Limited is one of the leading mining players in India. It is a State Public Undertaking of the Government of Gujarat. The state-owned company currently has five operational lignite mines located in Kutch, South Gujarat, and the Bhavnagar region. It is purportedly the largest merchant seller of lignite in the country.
