MP, Punjab CMs spar over GI badge for basmati rice

SANJEEB MUKHERJEE & AGENCIES
New Delhi, 6 August

The row over geographical indication (GI) tag for basmati rice flared up again on Thursday with Madhya Pradesh Chief Minister Shivraj Singh Chouhan terming his Punjab counterpart Amarinder Singh's opposition 'politically motivated' and a move that hurts farmers.

Singh in a letter to Prime Minister Narendra Modi had opposed Madhya Pradesh's bid for the GI tag for basmati on the grounds that any move to disturb the status quo will not only harm the interests of farmers and basmati exporters of India, but could also help Pakistan, which also produces basmati as per GI tagging in the international market.

Taking to Twitter, Chouhan alleged: "The case of Agricultural and Processed Food Products Export Development Authority with Pakistan has no relationship with Madhya Pradesh's claim as it is under the GI Act of India. It is not connected to inter-country claims of basmati rice."

"The matter should not be turned into a Punjab vs Madhya Pradesh tussle. GI tagging will provide stability to basmati

prices in international markets and bolster our exports," Chouhan said.

The Punjab chief minister has alleged that MP's move infringes the GI tagging procedure and laws. Chouhan replied: "Madhya Pradesh has a written recorded history since 1908 of basmati production in 13 districts. Records of supplying seeds to farmers in MP in the year 1944 was recorded in the records of Scindia State."

He said the Indian Institute of Rice Research, Hyderabad, had recorded production of basmati rice in their

Production Oriented Survey Report for the last 25 years. "Basmati exporters of Punjab and Haryana are procuring basmati rice from MP. This is also supported by Government of India data of export from the Mandideep (industrial area), Madhya Pradesh," he added.

In June, Madhya Pradesh Agriculture Minister Kamal Patel had said the state would move the apex court to challenge a Madras High Court's ruling in the matter of not providing the tag to MP's basmati-growing regions. The MP government and a basmati growers' association had lost two separate cases in the court filed in 2016 to challenge the exclusion of the districts from a map submitted by the APEDA for the tags.

Apart from Punjab, the states that have GI tagging for basmati are Haryana, Himachal Pradesh, Uttarakhand, Delhi, western UP, and select districts of Jammu and Kashmir. Madhya Pradesh has sought inclusion of its 13 districts for GI tagging for basmati. Exporters say granting GI tag for basmati rice grown in MP will lower its value in the international market while MP contends that its inclusion will benefit farmers in getting better price.

FROM PAGE 1

RBI pauses...

Besides, the earlier moratorium meant the interest would add back as principal, but restructuring would typically entail some relaxation on interest rates and tenure as well. The restructuring will be done specifically for cases facing Covid-19 disruption, and the accounts will be classified as "standard", which would allow banks to give more loans if needed. The restructuring will be done in accordance with rules laid down under the June 7, 2019, framework on resolving stressed assets, but with riders. To help the RBI on financial parameters, along with sector-specific benchmark ranges for such parameters, the central bank will constitute an expert committee under the chairmanship of veteran banker and former chief of New Development Bank K V Kamath.

The Covid scheme

In the June 7 circular, the "standard" asset category could be maintained only when there was a change in ownership. But under the latest policy measures, accounts can remain standard with the same ownership. Covid-related disruptions have led to heightened financial stress for borrowers across the board, according to the RBI governor. "A large number of firms that otherwise maintain a good track record under existing promoters face the challenge of their debt burden becoming disproportionate, relative to their cash flow generation abilities," Das said in his address.

The stress can potentially affect these companies' long-term viability and "pose significant financial stability risks if it becomes widespread", Das said. Micro, small, and medium enterprises (MSMEs) with a loan exposure of up to ₹25 crore (funds and non-funds combined) can avail of the benefit of restructuring.

Industry welcomed the restructuring schemes. "Industry is encouraged by the RBI's decision to provide a window under the prudential framework to enable lenders to implement a resolution plan in respect of their corporate exposures, with the necessary caveats in place," said Uday Kotak, president of the Confederation of Indian Industry.

"Sectors that are highly stressed due to Covid are in dire need of such restructuring," Kotak said. Seshagiri Rao, joint managing director and CEO of JSW Steel, said: "The measures will help industry, including steel." While short-term pressure on companies will be mitigated, Ramesh Nair, CEO and country head (India), JLL, said "one-time restructuring would have given the much-needed respite to the real estate sector, which has been facing headwinds."

Bankers, who otherwise were expecting a steep rise in non-performing assets

(NPAs), welcomed the move.

"We welcome the fact that a new resolution framework has been extended to large corporate, SME, and personal loans with necessary safeguards in each segment," said Rainish Kumar, chairman of State Bank of India. Zarin Daruwala, CEO, India, Standard Chartered Bank, said: "The resolution framework should help reduce the strain on the balance sheets of companies operating in affected sectors." Chandra Shekhar Ghosh, MD and CEO, Bandhan Bank, said: "The one-time restructuring of corporate and personal debt, including those of MSMEs, will help alleviate the stress faced by borrowers while ensuring the soundness of the banking system and focus on credit culture."

Finer points

The facility will be for those who were not in default for more than 30 days as of March 1, 2020. Such restructuring can be sought only till December 31 this year, and implementation has to be done by March 31, 2021, for personal loans and June 30, 2021, for other exposures. Though there will be layers of conditions for companies, the rules for personal loans will be much easier, and the RBI advised banks for "early invocation in eligible cases".

"The timelines for implementing resolution plan in the case of personal loans are assessed to be adequate since, unlike larger corporate exposures, there will not be any requirement for third-party validation by the expert committee, or by credit-rating agencies, or need for ICA (inter-creditor agreements)." "The contours of the plan may be decided based on the board-approved policies of the lenders subject to extension of the residual tenor of the loan, with or without payment moratorium, by a period not more than two years," the RBI said.

Other measures

Among other important measures, the central bank increased the loan-to-value ratio of gold loans to 90 per cent, from 75 per cent earlier. The RBI also included start-ups in priority-sector lending, and adjusted risk weights so that banks lend to states and sectors they tend to avoid. It is opening an innovation centre to deal with technologies and improve cyber security, and planning to introduce offline retail payments using cards and mobile devices, and ordered payment system providers to come up with an online dispute resolution for digital payments.

Taming Covid-19...

The National Statistical Office, however, will give its official GDP growth estimate for the June quarter at the end of this month. Supply disruptions are pushing inflation up for both the food and non-food segments. The MPC said a bumper rabi harvest and benign increases in support prices for upcoming kharif crops might tame food inflation. But it needs support from enhanced procurement from the government, it added. Cost pressures from high retail petrol and diesel prices at fuel stations, hikes in telecom charges, and rising raw material costs are pushing up non-food inflation, it added.

While agriculture would remain a bright spot in FY21 in terms of growth, non-farm high frequency indicators, which had improved post Unlock, have now "levelled off," the statement noted. The rural sector would provide a fillip, as fertiliser production and sales of tractors, motorcycles and fast-moving consumer goods look promising. Except pharmaceuticals, the industry is expected to contract sharply, as the RBI's business assessment index for the June quarter hit its lowest ever. Capital goods imports fell stronger than expected in June, signalling a deterioration in investment demand.

A sharp fall in imports in June and deterioration in con-

sumer confidence in July indicate weakening of domestic demand. External demand, too, is expected to remain anaemic, the statement said. Producers sold goods at prices lower than in Q1 of the previous year, and they saved on their wage bills — indicative of a fall in salaried class incomes. A more protracted spread of Covid-19, deviations from expected normalcy in monsoon rains, and volatility in the global financial system would dent the GDP contraction further, the MPC said. Keeping consumer inflation anchored at 4 per cent with a band gap of two percentage points is the MPC's mandate under the inflation targeting framework. But the committee, for the first time, said supporting growth had assumed primacy when the state of the economy was "extremely weak" due to the pandemic shock.

Scanty rains...

Other areas received normal rainfall. However the situation is changing now, he added. "There could have been some impact on crops if the break had carried on for longer, over Central India, given there were instances of plants withering. Thankfully, though, the monsoon revived just in time," said Mohapatra. He said the monsoon had entered a very active phase in Central India, which would cause improved rainfall. India has so far (till August 6) received 503.7 millimetres of rainfall, which is normal for this time of the year. "There has been a cumulative all-India shortfall (as of yesterday), which will be covered up, and in the next few days it will turn into a surplus," he said.

Facebook steps up...

Facebook invested \$5.7 billion for a 9.9 per cent stake in Jio Platforms, Reliance Industries' digital services arm, in April. JioMart is Reliance Retail's e-commerce platform.

Facebook-owned WhatsApp is collaborating with Jio Platforms and JioMart, which has been commercially launched to take on the might of Amazon and Flipkart.

Sources in the know say WhatsApp is creating a chat interface within its service for JioMart. Through this interface, consumers can order products, and kirana shops can fulfil them without either of them having to download a separate JioMart app. In one go, the interface will connect JioMart to over 400 million WhatsApp customers in the country, helping JioMart catch up with Amazon and Flipkart. Reliance is looking at connecting with over 20 million small retailers and restaurants, among others.

On the launch of WhatsApp Pay, Mohan said permission was expected soon. "In many ways, payment is all around the UPI stack and we hope that we can be an important vehicle in that to bring financial inclusion. We are fundamentally a platform company and we will partner with others who can leverage our scale," he said.

On Facebook's global restructuring, Mohan said that it took a call to treat India as a region sitting out of Asia Pacific and working directly with Facebook's US headquarters in Menlo Park.

Mohan asserted that Facebook is not like any other streaming company or OTT channel and does not commission content. Instead, it focuses on social videos and on bringing communities together.

The business model of monetisation will remain advertising revenues. "Our monetisation will be through advertising. We believe that keeping services free helps in getting the largest number of consumers," said Mohan.

Vodafone Idea loss...

"We continued to make progress on our strategy with integration largely complete, enabling us to realise cost synergies well ahead of our initial targets. We have launched a new cost optimisation initiative that will drive further savings. We continue to actively engage with the government seeking a comprehensive relief package for the industry," said the company's Managing Director Ravinder Takkar.
