PRESS RELEASE

Gravita to set up Copper Recycling plant at Mundra

Jaipur, August 19, 2026: Gravita India Limited (“Gravita” or the “Company”), a leading global recycling company, is pleased to announce its plans to add 59,200 Metric Tonnes Per Annum (MTPA) of copper recycling capacity at its Mundra, Gujarat facility.

Key Highlights

- **Planned Capacity Addition:** 59,200 MTPA of copper recycling capacity in phased manner
- **Location:** Mundra, Gujarat
- **Capital Expenditure:** Approximately ₹ 64.00 crores
- **Strategic Focus:** Expansion of non-ferrous metal recycling capabilities
- **Funding:** To be funded through internal accruals

The proposed copper recycling capacity will be primarily involved in the processing of copper-bearing recyclable materials, enabling the Company to recover copper and other valuable materials through its recycling capabilities. The planned 59,200 MTPA capacity addition will also serve as a backward integration initiative for the proposed Mandvi plant in Gujarat, strengthening the Company’s raw material sourcing and processing capabilities and creating greater operational integration across its copper recycling value chain. The proposed capacity addition is expected to be commissioned in phases by March 31, 2029.

The planned capacity addition marks another significant step in Gravita’s strategy to strengthen its presence in the non-ferrous metal recycling segment and capitalize on the growing demand for recycled copper across domestic and international markets.

This incremental copper recycling capacity will further strengthen the Company’s capabilities at its existing Mundra facility. The facility’s strategic location in close proximity to one of India’s major ports provides logistical advantages for sourcing raw materials and serving both domestic and international markets.

Strategic Significance

The planned addition of copper recycling capacity is aligned with Gravita’s long-term growth strategy of:

- Expanding its presence in the copper recycling segment;
- Increasing its overall non-ferrous metal recycling capacity;
- Catering to the growing demand for recycled copper; and
- Strengthening its position in the global circular economy.

About Gravita Group

Gravita Group is a leading global recycling group with operations across multiple recycling verticals. The Group is engaged in the recycling and manufacturing of Lead, Aluminium, Copper, Rubber, Plastics, and Lithium. Gravita Group continues to expand its recycling ecosystem through organic capacity additions, strategic investments, and acquisitions, with a strong focus on sustainability, resource efficiency, and the circular economy.

Forward Looking statement

This press release contains forward-looking statements, which are subject to risks and uncertainties. Actual results may differ materially due to factors including regulatory approvals, market conditions, and execution challenges.
