

Gayatri Rubbers and Chemicals Limited taps a new product line in Indian Railways with the launch of its product, Silicon Mobile holder.

Faridabad, 8th April, 2026 - Gayatri Rubbers and Chemicals Limited (NSE: GRCL) (INE0LVM01018), is pleased to announce its entry into a high-growth segment within the Indian Railways supply chain: **Fire-Retardant/Silicon Rubber Mobile Holders**. This foray marks a significant shift in railway coach interiors, transitioning from traditional plastic fittings to advanced, fire-retardant rubber solutions that prioritize passenger safety and product durability. The company has successfully **secured its first pilot order** for this specialized component.

The scale of this opportunity is substantial; with a standard Indian Railway coach catering to 72 passengers, the requirement stands at **72 units per bogey**. By replacing brittle plastic with specialized rubber compounds, the company is providing a solution that meets stringent safety standards while offering superior longevity in the demanding environment of long-distance rail travel.

The company's first plant in Faridabad, has capacity of 200MT and is operating at 120MT currently, which is approximately 60% utilisation. This plant produces specialised rubber components for the four sectors in which Gayatri is present; Industrial, Architectural, Automotive and Railways.

The second plant solely produces the 2 niche and specialized rubber products for Indian Railways (namely UIC Vestibules and Decoupling Rubber).

Management Perspective

Mr. Shilp Chotai, GRCL's Managing Director commented "At Gayatri Rubbers and Chemicals, we have always been driven by the philosophy of 'Safety through Innovation.' Securing this pilot order for fire-retardant/silicon rubber mobile holders is a milestone moment for us, especially as we prepare to supply prestigious projects like the Vande Bharat and Amrit Bharat trains. It validates our ability to capture markets previously dominated by lower-grade materials with superior, safety-compliant alternatives.

With 72 units required for every single coach, the volume potential across these expanding fleets is immense. We see this as just the beginning of our journey to becoming a cornerstone supplier for India's rail modernization, further strengthening our footprint in the railways sector."

About Gayatri Rubbers and Chemicals Limited

Incorporated in 2022 and headquartered in Faridabad, Haryana, Gayatri Rubbers and Chemicals Limited is a specialized manufacturer and trader of high-quality rubber products that serve as critical components for railway, industrial, automobile, and architectural applications.

The company is a key producer of EPDM rubber profiles, Neoprene rubber, Sponge rubber, and Automobile rubber profiles which are essential materials used for sealing and insulation. Its product portfolio caters to multiple sectors, including automotive, railways, and the smart meter industry.

With manufacturing facilities in Faridabad, brands like "GOYAL" and "Elements India," and a recent capacity expansion to meet growing demand, Gayatri Rubbers and Chemicals continues to drive value through precision manufacturing, durability, and operational excellence.
