Orient Green Power clocks ₹106 Cr H1 FY27 Net Profit with an industry-leading 76% EBITDA margin

Chennai, November 12, 2026 – Orient Green Power Company Limited (NSE - GREENPOWER | BSE - 533263 | INE999K01014), One of India's foremost independent renewable power producers, focused on renewable energy operations, has reported its Financial Results for Q2 and H1 FY27.

Key Financial Highlights (Consolidated, ₹ Cr)

Q2 FY27	**Total Income** **₹147 Cr** ▲ 8% YoY	**EBITDA** **₹117 Cr** ▲ 12% YoY Margin 80% ▲ 251 bps
H1 FY27	**Total Income** **₹233 Cr** ▲ 2% YoY	**EBITDA** **₹177 Cr** ▲ 4% YoY Margin 76% ▲ 147 bps

Solar capacity added in Q2

17.6 MW

Total solar capacity
24.6 MW

Business Highlights:

- We have reached H1 profit of ₹100 crore+ this year without the ₹16 crore one-time gain of last year. The Capacity additions and improved credit ratings helped in sustaining the same.
- Improved wind conditions during the quarter coupled with incremental generation from recently commissioned capacities offset the previous quarter's deficit leading to a marginal surplus.
- Revenues and EBITDA for the half year were marginally better by 2% y-o-y and 4% y-o-y respectively
- Net Profit however was lower as first half of previous fiscal had one-time exceptional income of ₹16 crore.
- Successfully commissioned 17.6 MW solar plant; along with already commissioned 7 MW solar plant, one of rights issue objectives was fulfilled.
- Repowering capex approaching final phase and to commission shortly subject to regulatory approvals.
- Entered into an EPC contract for expanding wind power capacity by 6.6 MW.
- Credit rating of material subsidiary upgraded to BBB by CRISIL; solar subsidiary rated BBB by ICRA.

Commenting on the performance, Mr. T Shivaraman, Managing Director & CEO, said:

"The wind availability improved in the current quarter when compared to the moderate wind of previous quarter. Coupled with the incremental generation from recently commissioned solar and wind capacities, the generation deficit witnessed in the previous quarter was reversed and surplus generation was achieved. This resulted in marginal improvement in operational profits for the first half of current fiscal.

In addition to the 7 MW solar plant already commissioned in the last fiscal, the company successfully added 17.6 MW solar capacity during the quarter and fulfilled one of the rights issue objects. The repowering project of 7.8 MW old wind turbines to improve operating efficiencies is nearing completion and anticipated to be commissioned in the upcoming quarter

subject to regulatory approvals. The company has also entered into contract for adding 6.6 MW of wind capacity. The above capex are anticipated to be available in entirety for the next wind season and benefit the performance in years to come."

About Orient Green Power Company Limited

Orient Green Power Company Limited (OGPL), headquartered in Chennai and promoted by SVL Limited, is among the largest independent renewable power producers in India. The Company currently operates ~381.7 MW of wind power capacity across high-potential states such as Tamil Nadu, Andhra Pradesh, Gujarat, and Karnataka, alongside a 10.5 MW wind farm in Croatia, Europe and a 24.6 MW solar power plant in Tamil Nadu.

As a top independent operator and developer of wind farms in India by aggregate installed capacity, OGPL has built its expertise in identifying optimal locations, deploying advanced wind turbine designs, and maximizing generation efficiency. Its projects are strategically located in states with strong wind energy potential and supportive renewable energy policies, reinforcing its competitive positioning in the sector. By combining years of operational experience, strong technical capabilities, and a commitment to sustainable growth, the Company continues to play a key role in advancing India's renewable energy transition.

In FY26, the company on a consolidated basis reported Total Income of ₹315.57 Cr, EBITDA of ₹205.45 Cr and Net Profit of ₹71.57 Cr.
