Adani's Copper Smelter Targets Up to 85% Utilisation by March on Assured Supplies

Nikita Periwal

Mumbai: The Adani Group faces no significant challenges in procuring copper concentrate for its smelter operations and expects higher capacity utilisation than previously anticipated, a senior executive said. Global supplies of copper concentrate have been tight, particularly over the past two years, as smelting capacity has expanded faster than mining output. Copper mining is also geographically concentrated, with the top three producing countries accounting for nearly 50% of global output.

"As far as the procurement of raw material is concerned, we have not seen any significant challenge in terms of what we are hearing otherwise in the market, because we have some of the long-term contracts tied up to a significant part of our requirement," said Manan Vakharia, head of finance at Adani Enterprises.

Kutch Copper, housed within Adani Enterprises as one of the group's incubation businesses, commissioned its smelter in 2024. As one of only two major operational copper smelters in the country, it is ramping up towards its initial capacity of 500,000 tonnes.

"We have already tied up approximately 50%-60% of our requirement (of concentrate) on the long-term basis, and on a short-term basis, another 20% is already contracted," Vakharia told analysts after the company's quarterly earnings.

The assured supply of raw material will help the company raise capacity utilisation to 80%-85% by March, Vakharia said. In July, the company had guided that utilisation would reach 75% by the end of the fiscal year.

Kutch Copper operated at 64% utilisation in the September quarter, producing 80,200 tonnes of copper and selling 80,600 tonnes. The business reported revenue of ₹14,843 crore and earnings before interest, tax, depreciation and amortisation (EBITDA) of ₹1,283 crore during the quarter.

The smelter generated EBITDA of ₹2,033 crore in the first half of the fiscal year, compared with a loss at the operating level of ₹320 crore in the year-ago period. Kutch Copper had guided for EBITDA of ₹3,100 crore in the current fiscal year and has already achieved about 65% of its target.

While capacity utilisation and revenue are expected to increase in the second half, EBITDA may not grow proportionately. This is because elevated sulphuric acid prices, which are currently supporting profitability, are expected to moderate.

Margins are expected to settle at around 5% in the long run, Robbie Singh, chief financial officer of Adani Enterprises, had said in August. In the September quarter, margins stood at around 8.6%.

Zydus Life's Q2 Profit Down 27%

New Delhi: Zydus Lifesciences on Wednesday reported a 26.6% decline in consolidated net profit to ₹925.5 crore in the September quarter, weighed down by higher expenses.

The company had posted a net profit of ₹1,260.9 crore in the corresponding period of the previous fiscal year, it said in a regulatory filing.

Revenue from operations rose 29.2% to ₹7,909.6 crore during the quarter from ₹6,123.2 crore a year earlier. Total expenses increased sharply to ₹6,806.6 crore during the quarter from ₹4,509 crore in the same period last year.

Revenue from operations rose 29.2% to ₹7,909.6 cr during the quarter from ₹6,123.2 cr a year earlier. Total expenses increased sharply to ₹6,806.6 cr during the quarter from ₹4,509 cr in the same period last year

During the quarter, the pharmaceuticals business accounted for 83% of the company's sales, Zydus said in a statement. Its India formulations business reported revenue of ₹1,884.4 crore, up 18% year-on-year, while the North America formulations business posted revenue of ₹3,314.5 crore, rising 21%, driven by sustained volume expansion in the base business and the continued scale-up of its US specialty business. "Our Q2 performance reflects strong, all-round momentum, spearheaded by our branded businesses in India, international markets and wellness. Notably, the share of branded sales in the US has risen to 16 per cent, underscoring our steady shift towards a more differentiated, specialty-led portfolio," Zydus Lifesciences managing director Sharvil Patel said.

"We look forward to the approval and launch of Saroglitazar in the US, our first indigenously discovered NCE, which marks a pivotal point in our evolution," he added. During the first half of FY27, the pharma company's net profit declined 30.9% to ₹1,885.9 crore from ₹2,727.7 crore a year earlier. —**PTI**

After Tax Stub, FMCG and Allied Units Can Bring ITC the Glow

Digital-first brands, foods and premiumisation expected to emerge as key earnings drivers

Snehal.Mergu

ET Intelligence Group: Amid continued pressure on its cigarettes business, ITC's future growth will depend on the success of strategies such as premiumisation, distribution expansion, the scaling up of digital-first brands including Yoga Bar and Prasuma, a recovery in the paperboards business, and a higher contribution from fresh foods and value-added agri products.

The company's September-quarter performance highlighted the growing importance of its non-cigarette businesses as a sharp increase in taxes continued to weigh on cigarette volumes and profitability. Strong growth in FMCG, paperboards, agri and digital-first brands helped cushion the impact. While cigarette taxation, commodity inflation and geopolitical uncertainties remain key risks, the pace of growth in ITC's increasingly diversified portfolio will be crucial for sustaining long-term growth beyond its traditional cigarettes business.

After remaining range-bound for the past three months, the stock has gained 5.1% in two trading sessions since the company reported its September-quarter results on Monday evening.

The FMCG business continued to emerge as a key growth driver, with the FMCG-others segment delivering its highest growth in 14 quarters, led by strong demand across foods, biscuits, snacks, dairy, personal care, notebooks and home-care categories. The segment's margin expanded by more than 50 basis points year-on-year and on a sequential basis, despite inflationary pressures, supported by an improved product mix, cost-management initiatives and calibrated pricing actions.

Meanwhile, digital-first brands such as Yoga Bar, Prasuma and Mother Sparsh maintained strong momentum, posting 70% year-on-year growth and crossing a combined annual revenue run rate of more than ₹1,800 crore.

The paper business also maintained strong momentum, driven by improved demand and the integration of Century Pulp & Paper, while the agri business continued to benefit from growth in value-added products and exports.

Analysts believe these businesses, along with the scaling up of the fresh foods portfolio, will act as key earnings growth drivers.

Religare Broking has maintained a 'buy' rating on the stock with a target price of ₹408, implying a 46% upside from Wednesday's closing price of ₹279.7. The stock's trailing price-to-earnings (P/E) multiple of around 18.2 is below its five-year average of 26.
