GTPL Hathway Limited Launches Its HITS Platform, “GTPL Infinity” Ushering In An Era of Seamless Entertainment Delivery

Ahmedabad, India – November 29, 2025 – GTPL Hathway Limited, India’s largest Digital Cable TV provider and a leading broadband service provider, today announced the launch of **GTPL Infinity**, its Headend in the Sky (HITS) platform that redefines digital broadcasting infrastructure and content delivery across India.

GTPL Infinity is backed by one of the **World’s largest C-Band teleport setup**, located in Ahmedabad, Gujarat. This strategic investment positions GTPL at the forefront of satellite-based content distribution, enabling **PAN-India availability** with **~800 channels**, including **~100 HD channels**—delivered seamlessly nationwide.

GTPL Infinity aligns with the Digital Bharat vision and is designed to empower partners with a reliable, high-quality digital signal delivery system with world-class, state-of-the-art infrastructure. GTPL Infinity is powered by multiple C-Band transponders on the Satellite Telkom-4 through an agreement with Asia’s leading satellite operator PT Telkomsat Satellite, Indonesia.

The platform will enable GTPL to offer its services nationwide with reduced delivery costs, and open new monetization avenues through content partnerships and regional expansion. Digital Service Providers (LMOs/LCOs, MSOs, Commercial Establishments, etc.) can Go-To-Market faster through quick infrastructure setup, using a single dish antenna and minimal investment. The satellite delivery of signals guarantees high uptime and reliability while the high-quality equipment ensures low maintenance.

An association with GTPL will enable partners to offer an array of services including High-Speed Broadband, bundled OTT services, Cloud Gaming, etc., in addition to Digital Cable TV, to effectively serve customer demand for all their Entertainment and Connectivity needs.

Highlights for GTPL Infinity

- **Nationwide Scalability:** GTPL Infinity enables rapid deployment with a **single downlink antenna**, allowing business partners to go live within **a very short time of as low as 24-hours**—a game-changer for underserved regions.

- **Content Depth & Diversity:** With a planned capacity of ~ 800 channels, including ~100 HD offerings, GTPL Infinity supports regional, national, and niche content needs—boosting subscriber engagement and retention.
- **Infrastructure Advantage:** The green-field Ahmedabad teleport infrastructure has expandable capacity, redundancy, and high uptime—creating a robust backbone for current and future services.
- **Inclusive Growth:** GTPL Infinity extends high-quality signal delivery to **remote and rural areas**, unlocking new markets and supporting digital inclusion across socio-economic strata.

“GTPL Infinity represents a significant milestone in our journey to modernize and democratize content delivery across India” said Mr. Anirudhsinh Jadeja, Managing Director, GTPL Hathway Ltd. “By leveraging one of the world’s largest C-Band teleport infrastructures, we are not only scaling our operational capabilities but also unlocking new efficiencies for our partners—enabling faster deployment, broader reach, and superior signal quality. More importantly, GTPL Infinity reflects our unwavering commitment to inclusive access. Whether in metros, small towns, or remote villages, we are ensuring that every household has the opportunity to experience high-quality entertainment and information. This is not just a technological upgrade—it’s a national enabler for digital equity and growth.”

Vishal Mathur, Managing Partner of VMCLLP and authorized representative of PT Telkomsat in India, commented: “India’s broadcast landscape is undergoing a dynamic transformation, and our partnership with GTPL marks a pivotal step in expanding digital television access across rural and semi-urban regions. By leveraging Telkomsat’s satellite infrastructure and regional video neighborhood, GTPL is well-positioned to scale its HITS platform and deliver reliable, carrier-grade services nationwide. We’re proud to support India’s digital broadcast journey and contribute meaningfully to its continued growth.”
