HCLTech launches AI Force 2.0 to deliver enterprise-grade Agentic AI

NEW YORK and NOIDA, India, April 01, 2026 – [HCLTech](#), a leading global technology company, today announced the launch of **AI Force 2.0**, the next evolution of its proprietary [enterprise AI platform](#).

The new version integrates agentic intelligence with generative AI to help enterprises accelerate and augment workflows across software and data engineering, IT operations and enterprise business processes. It also improves decision-making and business process efficiency, while maintaining strong governance, security and measurable ROI.

AI Force 2.0 is a model agnostic, modular platform unifying engineering, operations and applications within a single intelligence fabric. The platform enables AI agents to analyze data, make context aware decisions and take autonomous action at scale.

The platform offers an extensive library of prebuilt assets, including prompts, agents, workflows and ready-to-deploy use cases, while allowing enterprises to create and customize solutions aligned to their specific needs. AI Force 2.0 also strengthens HCLTech's enterprise governance framework through embedded Responsible AI evaluators that ensure trust, auditability and fairness.

"AI Force 2.0 represents a significant leap forward in how enterprises harness AI solutions for transformation. By unifying agentic intelligence with enterprise-grade GenAI, we are enabling our clients to fundamentally reimagine software, data and operations lifecycles. This platform is engineered to deliver deep automation, accelerated modernization and unprecedented agility, helping global enterprises move faster, operate smarter and unlock value at scale," said Vijay Guntur, Chief Technology Officer and Head of Ecosystems at HCLTech
